

SWOT, PESTEL, Porter's Five Forces and Value Chain Analysis of Tesco

Introduction

This report is aimed at critically analysing the macro, meso and micro business environment of Tesco, one of the largest food and grocery retailers in the world, operating around 4,331 stores. Strategic evaluation tools such as PESTEL, Porter's Five Forces, SWOT and Value Chain analysis have been used by researchers in order to achieve this aim.

Tesco – Company Overview

Tesco is among the largest food retailers in the world with revenue in excess of £54 billion in 2009 and employing over 470,000 people . They operate approximately 4,331 stores in 14 countries around the world. The company operates primarily in the USA, Europe and Asia and their Head Office is based in Hertfordshire, UK. According to Datamonitor (2010), the commercial network portfolio of Tesco comprises : over 960 Express stores which sell approximately 7,000 products including fresh foods at suitable localities ; 170 Metro stores which sell a variety of food products in town and city centres; and 450 superstores which sell both food and non-food items including books and DVDs. Tesco also provides online retailing services through their website tesco.com and Tesco Direct . In addition, they provide broadband Internet connections and financial services through Tesco Personal Finance (TPF). Tesco was founded in 1919 and launched its first store in Edgware, London, UK in 1929 (Tesco, 2010); however, over the decades it has evolved to become the market leader within the UK food retail segment (Datamonitor, 2010). The comparative positioning of Tesco's market share with respect to other leading players in the market has been illustrated as follows (Euromonitor, 2010):

Food Safety Management Serge Imboden, 2013-11-01 What makes a good boss a good manager This is a question that has always intrigued leadership and management theorists Various models and theories of leadership have been put forward both to explain leadership success and to deliver recommendations for action to improve leadership practice or to solve

problems For a better understanding a model of effective leadership is developed effective leadership is possible but it places demands on leaders Effective leadership can be learned but this entails a considerable cost Leadership is not actually just something that can be done off the cuff professional leadership is an independent occupation that one must spend a considerable amount of time learning and experiencing Effective leadership thus means applying the right mix of leadership management and entrepreneurship skills in the right place and at the right time in order to achieve the set company objectives and in order to motivate and continue developing employees

Airbus versus Boeing. Strategic Management Report Sascha Mayer, 2008-03-11 Scientific Study from the year 2007 in the subject Business economics Operations Research grade 1 0 University of Southern California Business Faculty course Strategic Management language English abstract The purpose of this report is to provide a Strategic Management Report with detailed strategic analyses of the dominant civil aircraft manufacturers Airbus and Boeing The discussion main part of this report is separated into internal and external analyses which are reasoned in greater detail and supported with reasonable graphs and tables in the attached Appendices Finally conclusions are drawn as to which is the more strategic savvy and which company has the more sustainable enterprise and there is a recommendation given in which company a potential investor should rather invest in Airbus and Boeing are having a neck and neck race in the aircraft industry for jets over 100 seats between Airbus and Boeing about the market leadership After Airbus overtook its rival the first time in 2001 in terms of aircraft order and delivery it stayed in front the last years until Boeing got back on top in 2006 The aircraft manufacturing industry is constantly growing a global market and had a size of US 63 billion revenues in 2006 It is characterized by high entry barriers and investment in R D and by a duopoly with Airbus and Boeing having a market share of 86% for aircrafts over 100 seats At the moment Airbus is in weaker financial position than its competitor Boeing had an average year in 2006 with a moderate and good profitability whereas Airbus is not in the red but it is remarkable that the company had a bad year caused by the production and delivery problems with the A380 connecting with the delay compensations In general both Airbus and Boeing experience a strong support by the parent companies whereas Boeing's outstanding and tightened military division strongly keeps the commercial airplane division on the ground and gives it an

edge In terms of product strategy the strength of the one is the weakness of the other Boeing found no real answer on the A380 as mega jumbo but is highly successful with its B787 in the mid size long range segment where Airbus is lagging behind with its try to catch up through the A350 The market opportunities for both companies and strategies exist with increasing air traffic especially in Asia with its upcoming markets China and India On the other side increasing prices for raw materials or indirectly oil price fluctuations and the risk of a new external shocks are threatening the performance
