

THE AGE OF SUSTAINABLE DEVELOPMENT

The background of the slide is a composite image. It shows a view of the Earth from space, with the blue oceans and white polar ice caps visible. On top of the Earth's horizon, there is a lush green forest and a modern city skyline with several skyscrapers. The sky is a deep blue with some wispy clouds. The overall theme is environmental sustainability and the integration of nature and urban development.

Age Sustainable Development Jeffrey Sachs :

The Age of Sustainable Development Jeffrey D. Sachs, 2015-03-10 Jeffrey D Sachs has shown himself to be one of the world's most perceptive and original analysts of global development in his groundbreaking books including *The End of Poverty* and *Common Wealth Economics for a Crowded Planet*. Now in this major new work he presents a compelling and practical framework for how global citizens can address the seemingly intractable worldwide problems of persistent extreme poverty, environmental degradation and political economic injustice. Sachs outlines the holistic way forward: sustainable development. This provocative work offers readers, students, activists, environmentalists and policy makers the tools, metrics and practical pathways they need to achieve Sustainable Development Goals. Far more than a rhetorical exercise, this book is designed to inform, inspire and spur action. Based on Sachs's twelve years as director of the Earth Institute at Columbia University, his thirteen years advising the United Nations secretary general on the Millennium Development Goals, and his recent presentation of these ideas in a popular online course, *The Age of Sustainable Development* is a landmark publication and a clarion call for all who care about our planet and global justice. *The Age of Sustainable Development* Jeffrey

Development Radhika Iyengar, Pooja Iyengar, 2023-11-02 This book showcases and compares grassroots environmental education initiatives and actions in Millburn, New Jersey in the USA and Bhopal, Madhya Pradesh in India. Across the two towns, the collective actions discussed include the Fridays For Future strikes, activism through school's green team, plastic clean up missions, conducting workshops, conferences and organizing green fairs. The authors discuss a range of concepts and ideas that have a broader relevance to local and global environmental education, such as global citizenship, climate activism, national and municipal policies, gender and ecofeminism. They show how the stories of the two towns are connected with sustainable development goals and education for sustainable development. Ultimately, the book shows how education can be used as a tool to promote climate change solutions and how this can benefit schools, communities and the planet. The book includes a Foreword written by Ruth DeFries, University of Denning Professor of Sustainable Development at Columbia University, USA. **Sustainable Development Goals** Duncan French, Louis J.
