Pan, 2013-07-19 We discuss the secant method where are initial guesses In the Regula Falsi variation we start with initial

guesses and such that after an iteration similar to the above we replace either a or b by the new value depending on which of

or has the same sign as Often one of the points gets stuck and several variants such as the Illinois or Pegasus methods and

variations are used to unstick it We discuss convergence and efficiency of most of the methods considered We treat methods

involving quadratic of higher order interpolation and rational approximation We also discuss the bisection method where

again and we set We replace a or b by c according to the sign of as in the Regula Falsi method Various generalizations are

described including some for complex roots Finally we consider hybrid methods involving two or more of the previously
