Alphabetic Labyrinth The Letters In History And Imagination:

The Alphabetic Labyrinth Johanna Drucker, 1995 *The Alphabetic Labyrinth* Johanna Drucker, 1995 Johanna Drucker has spent many years researching writing and typography this book is the result of a lifetime's interest In it she examines the many imaginative often idiosyncratic ways in which the letters of the alphabet have been assigned value in political spiritual or religious belief systems over two millennia as well as presenting the more general aspects of the history of lettering printing and calligraphy **Letter Perfect** David Sacks, 2010-08-20 Letters are tangible language Joining together in endless combinations to actually show speech letters convey our messages and tell our stories While we encounter these tiny shapes hundreds of times a day we take for granted the long fascinating history behind one of the most fundamental of human inventions the alphabet The heart of the book is the 26 fact filled biographies of letters A through Z each one identifying the letter's particular significance for modern readers tracing its development from ancient forms and discussing its noteworthy role in literature and other media We learn for example why the letter X has a sinister and sexual aura how B came to signify second best why the word mother in many languages starts with M and what is the story of O Packed with information and lavishly illustrated Letter Perfect is not only accessible and entertaining but essential to the appreciation of our own language **The Letter and the Cosmos** Laurence de Looze, 2016-01-01 The Letter and the Cosmos is a sharp and entertaining examination of how languages letterforms orthography and writing tools have reflected our hidden obsession with the alphabet **The Typographic Medium** Kate Brideau, 2021-10-12 An innovative examination of typography as a medium of communication rather than part of print or digital media Typography is everywhere and yet widely unnoticed When we read type we fail to see type In this book Kate Brideau considers typography not as part of print media or digital media but as a medium of communication itself able to transcend the life and death of particular technologies Examining the contradiction between typographic form often overlooked and function often overpowering Brideau argues that typography is made up not of letters but of shapes and that shape is existentially and technologically central to the typographic medium After considering what constitutes typographic form Brideau turns to typographic function and how it relates to form Examining typography's role in both the neurological and psychological aspects of reading she argues that typography's functions exceed reading typographic forms communicate but that communication is not limited to the content they carry To understand to what extent the design and operations of the typographic medium affect the way we perceive information Brideau warns we must understand the medium's own operational logic embodied in the full diversity of typographic forms Brideau discusses a range of topics from intellectual property protection for typefaces to Renaissance and Enlightenment ideal letterforms and draws on a wide variety of theoretical work including phenomenological ideas about comprehension German media archaeology and the media and communication theories of Vilém Flusser and others Hand drawn illustrations of typographic forms accompany the text **Handbook of Research on Knowledge-Intensive Organizations** Jemielniak,

From Point to Pixel Meredith Hoy, 2017-01-03 In this fiercely ambitious study Meredith Anne Hoy seeks to reestablish the very definitions of digital art and aesthetics in art history She begins by problematizing the notion of digital aesthetics tracing the nineteenth and twentieth century movements that sought to break art down into its constituent elements which in many ways predicted and paved the way for our acceptance of digital art Through a series of case studies Hoy questions the separation between analog and digital art and finds that while there may be sensual and experiential differences they fall within the same technological categories She also discusses computational art in which the sole act of creation is the building of a self generating algorithm The medium isn t the message what really matters is the degree to which the viewer can sense a creative hand in the art
