Stonecash, 2013 How do parties respond to the electorate and craft winning strategies In the abstract parties are the vehicles to make democracy work but it is often difficult to see the process working as well as we think it might Indeed voters often struggle to see parties as the valuable vehicles of representation that so many academics describe There is a clear discrepancy between the ideal expressed in many textbooks and the reality that we see playing out in politics Noted scholar

Jeffrey Stonecash gives us a big picture analysis that helps us understand what is happening in contemporary party politics. He explains that parties behave the way they do because of existing political conditions and how parties adapt to those conditions as they prepare for the next election. Parties are unsure if realignment has stabilized and just what issues brought them their current base. Does a majority support their positions and how are they to react to ongoing social change? Is the electorate paying attention and can parties get a clear message to those voters? This book focuses on the challenges parties face in preparing for future elections while seeking to cope with current conditions. This coping leads to indecisiveness of positioning, simplification of issues, repetition of messages, and efforts to disparage the reputation of the opposing party. Stonecash sheds much needed light on why parties engage in the practices that frustrate so many Americans. *American Government and Popular Discontent* Steven E. Schier, Todd E. Eberly, 2013-07-18 Popular distrust and the entrenchment of government by professionals lie at the root of America's most pressing political problems. How did U.S. politics get to this point? Contemporary American politics got much of its shape from the transformations brought about from the 1950s to the 1980s. Presidential and congressional behavior, voting behavior, public opinion, public policy, and federalism were all reconfigured during that time, and many of those changes persist to this day and structure the political environment in the early twenty-first century. Throughout American history, parties have been a reliable instrument for translating majority preferences into public policy. From the 1950s to the 1980s, a gradual antiparty realignment alongside the growth of professional government produced a new American political system of remarkable durability and remarkable dysfunction. It is a system that is paradoxically stable despite witnessing frequent shifts in party control of the institutions of government at the state and national level. Schier and Eberly's system level view of American politics demonstrates the disconnect between an increasingly polarized and partisan elite and an increasingly disaffected mass public. **Fundamentals of Military Medicine** Francis G. Education and the Culture of Consumption David Hartley, 2012 For nearly 200 years the organisational form of the school has changed little Bureaucracy has been its enduring form The school has prepared the worker for the factory of mass production It has created the mass consumer to be content with accepting what is on offer not what is wanted However a revised educational code appears to be emerging This code centres upon the concept of personalisation which operates at two levels first as a new mode of public service delivery and second as a new grammar for the school with new flexibilities of structure and pedagogical process Personalisation has its intellectual roots in marketing theory not in educational theory and is the facilitator of education for consumption It allows for the market to suffuse even more the fabric of education albeit under the democratic sounding call of freedom of choice Education and the Culture of Consumption raises many questions about personalisation which policy makers seem prone to avoid Why now are we concerned about personalisation What are its theoretical foundations What are its pedagogical curricular and organisational consequences What are the consequences for social justification of personalisation Does personalisation diminish the socialising function of the school or does it simply mean that the only thing we share is that we have the right to personalised service All this leads the author to consider an important question for education does personalisation mark a new regulatory code for education one which corresponds with both the new work order of production and with the makeover prone tendencies of consumers The book will be of great interest to postgraduate students and academics studying in the fields of education policy and the social foundations of education and will also be relevant to students studying public policy especially health care and social care and public management

The Race Controversy in American Education Lillian Dowdell Drakeford Ph.D.,2015-07-28 In this unique two volume work expert scholars and practitioners examine race and racism in public education tackling controversial educational issues such as the school to prison pipeline charter schools school funding affirmative action and racialized curricula This work is built on the premise that recent efforts to advance color blind race neutral educational policies and reforms have not only proven ineffective in achieving racial equity and equality of educational opportunities and outcomes in America s public schools but also exacerbated existing inequalities That point is made through a collection of essays that examine the consequences of racial inequality on the school experience and success of students of color and other historically marginalized populations Addressing K 12 education and higher education in historically black as well as predominantly white institutions the work probes the impact of race and racism on education policies and reforms to determine the role schools school processes and school structures play in the perpetuation of racial inequality in American education Each volume validates the impact of race on teaching and learning and exposes the ways in which racism manifests itself in U S schools In addition practical recommendations are presented that may be used to confront and eradicate racism in education By exposing what happens when issues of race and racism are marginalized or ignored this collection will prepare readers to resist and perhaps finally overcome the racial inequality that plagues America s schools
