Age Of Context Mobile Sensors Data And The Future Privacy Robert Scoble:

Age of Context Robert Scoble, Shel Israel, 2014 In 2006 co authors Robert Scoble and Shel Israel wrote *Naked Conversations* a book that persuaded businesses to embrace what we now call social media Six years later they have teamed up again to report that social media is but one of five converging forces that promise to change virtually every aspect of our lives You know these other forces already mobile data sensors and location based technology Combined with social media they form a new generation of personalized technology that knows us better than our closest friends Armed with that knowledge our personal devices can anticipate what we ll need next and serve us better than a butler or an executive assistant The resulting convergent superforce is so powerful that it is ushering in a era the authors call the Age of Context In this new era our devices know when to wake us up early because it snowed last night they contact the people we are supposed to meet with to warn them we re running late They even find content worth watching on television They also promise to cure cancer and make it harder for terrorists to do their damage Astoundingly in the coming age you may only receive ads you want to see Scoble and Israel have spent more than a year researching this book They report what they have learned from interviewing more than a hundred pioneers of the new technology and by examining hundreds of contextual products What does it all mean How will it change society in the future The authors are unabashed tech enthusiasts but as they write an elephant sits in the living room of our book and it is called privacy We are entering a time when our technology serves us best because it watches us collecting data on what we do who we speak with what we look at There is no doubt about it Big Data is watching you The time to lament the loss of privacy is over The authors argue that the time is right to demand options that enable people to reclaim some portions of that privacy *Age of Context* Robert Scoble, Shel

Israel, 2013-09-23 **Digital Data Collection and Information Privacy Law** Mark Burdon, 2020-04-23 In *Digital Data Collection and Information Privacy Law* Mark Burdon argues for the reformulation of information privacy law to regulate new power consequences of ubiquitous data collection Examining developing business models based on collections of sensor data with a focus on the smart home Burdon demonstrates the challenges that are arising for information privacy s control model and its application of principled protections of personal information exchange By reformulating information privacy s primary role of individual control as an interrupter of modulated power Burdon provides a foundation for future law reform and calls for stronger information privacy law protections This book should be read by anyone interested in the role of privacy in a world of ubiquitous and pervasive data collection *New Media Users in China I* Peng Lan, 2023-09-29 As the first volume of a two volume set on new media users in China this book approaches the subject from a macro level by regarding users as constructive nodes within networks thereby giving insights into the interaction between users and new media and among individuals within the ambit of new media The author revisits the roles of the typical new media user that has changed from that of a passive audience member to a basic unit of the network itself acting as both a node in the communication network

social network and service network and also a link between the three In viewing users as nodes functioning in communication networks and social networks this volume unravels the new landscapes of communication of the new media era and the consequent profound changes in social relationships interpersonal connection modes and different methods of interaction In terms of their role in service networks resting upon the network economy new media users not only are consumers with personalized needs but also serve as service guides resource contributors and even major productive forces This title will be a must read for scholars students and media professionals interested in the topics of internet communication new media usage and media and society as a whole

Developing Moral Sensitivity Deborah Mower, Wade L. Robison, Phyllis Vandenberg, 2015-05-15 Moral sensitivity affects whether and how we see others note moral concerns respond with delicacy and navigate complex social interactions Scholars from a variety of fields explore the concept of moral sensitivity and how it develops beginning with a natural moral capacity for sensitivity towards others that is shaped in a variety of ways through relationships forms of teaching and social institutions Each of these influences alters the capacity as well as one s responses in complex ways The concept of moral sensitivity deepens as progressive chapters demonstrate its increasing complexity through development within individuals over time as they mature and as their relationships and social contexts expand The chapters integrate research from philosophy psychology neuroscience literature education and media and technology studies with key chapters by Darcia Narves Nancy E Snow Michael S Pritchard and Stephen J Thoma and a Foreword by Owen Flanagan It is the only comprehensive presentation of interdisciplinary work on moral sensitivity that integrates a theoretical methodological and pedagogical analysis This highly interdisciplinary approach provides a new way of thinking about the relationship of individuals to society and moral sensitivity as a social phenomenon extending current research in ethics moral

The Counterside of Media Henning Schmidgen, 2021-11-22 We regularly touch and handle media devices At the same time media devices such as body scanners car seat pressure sensors and smart phones scan and touch us In Horn Henning Schmidgen reflects on the bidirectional nature of touch and the ways in which surfaces constitute sites of mediation between interior and exterior Schmidgen uses the concept of horn whether manifested as a rhinoceros horn or a musical instrument to stand for both natural substances and artificial objects as spaces of tactility He enters into creative dialogue with artists scientists and philosophers ranging from Salvador Dalí William Kentridge and Rebecca Horn to Sigmund Freud Walter Benjamin and Marshall McLuhan who plumb the complex interplay between tactility and technological and biological surfaces Whether analyzing how Dalí conceived of images as tactile entities during his rhinoceros phase or examining the problem of tactility in Thomas Pynchon's *The Crying of Lot 49* Schmidgen reconfigures understandings of the dynamic phenomena of touch in media

[Our Grandchildren Redesigned](#) Michael Bess, 2016-09-06 A panoramic overview of biotechnologies that can endlessly boost human capabilities and the drastic changes these superhuman traits could trigger Biotechnology is moving fast In the coming decades advanced pharmaceuticals bioelectronics and genetic interventions will be used not only to heal the sick but to boost human physical and mental performance to unprecedented levels People will have access to pills that make them stronger and faster informatic devices will interface seamlessly with the human brain and epigenetic modification may allow people to reshape their own physical and mental identities at will Until recently such major technological watersheds like the development of metal tools or the industrialization of manufacturing came about incrementally over centuries or longer People and social systems had time to adapt they gradually developed new values norms and habits to accommodate the transformed material conditions But contemporary society is dangerously unprepared for the dramatic changes it is about to experience down this road on which it is already advancing at an accelerating pace The results will no doubt be mixed People will live longer healthier lives will fine tune their own thought processes and will generate staggeringly complex and subtle forms of knowledge and insight But these technologies also threaten to widen the rift between rich and poor to generate new forms of social and economic division and to force people to engage in constant cycles of upgrades and boosts merely to keep up Individuals who boost their traits beyond a certain threshold may acquire such extreme capabilities that they will no longer be recognized as unambiguously human In this important and timely book prize winning historian Michael Bess provides a clear nontechnical overview of cutting edge biotechnology and paints a vivid portrait of a near future society in which bioenhancement has become a part of everyday life He surveys the ethical questions raised by the enhancement enterprise and explores the space for human agency in dealing with the challenges that these technologies will present Headed your way over the coming decades new biotechnologies that can powerfully alter your body and mind The possibilities are tantalizing Rejuvenation therapies offering much longer lives 160 and even beyond in full vigor and mental acuity Cognitive enhancement through chemical or bioelectronic means the rough equivalent of doubling or

tripling IQ scores Epigenetic tools for altering some of your genetically influenced traits at any point in your lifetime body shape athletic ability intelligence personality Bioelectronic devices for modulating your own brain processes including your pleasure centers a potentially non stop high Direct control of machines by thought and perhaps direct communication with other people brain to brain a new dimension of sharing and intimacy But some of the potential consequences are also alarming A growing rift between the biologically enhanced and those who can't afford such modifications A constant cycle of upgrades and boosts as the bar of normal rises ever higher Humans 95 Humans XP Humans 8 The fragmentation of humankind into rival bioenhancement clusters A gradually blurring boundary between person and product Extreme forms of self modification with some individuals no longer recognized as unambiguously human
