 Persistence* Malcolm P. Atkinson,Peter Buneman,Ronald Morrison,2012-12-06 There is an established interest in integrating
 databases and programming languages This book on Data Types and Persistence evolved from the proceedings of a workshop
 held at the Appin in August 1985 The purpose of the Appin workshop was to focus on these two aspects persistence and data
 types and to bring together people from various disciplines who have thought about these problems Particular topics

of interest include the design of type systems appropriate for database work the representation of persistent objects such as data types and modules and the provision of orthogonal persistence and certain aspects of transactions and concurrency The programme was broken into three sessions morning late afternoon and evening to allow the participants to take advantage of two beautiful days in the Scottish Highlands The financial assistance of the Science and Engineering Research Council the National Science Foundation and International Computers Ltd is gratefully acknowledged We would also like to thank Isabel Graham Anne Donnelly and Estelle Taylor for their help in organising the workshop Finally our thanks to Pete Bailey Ray Carick and Dave Munro for the immense task they undertook in typesetting the book The convergence of programming languages and databases to a coherent and consistent whole requires ideas from and adjustment in both intellectual camps The first group of chapters in this book present ideas and adjustments coming from the programming language research community This community frequently discusses types and uses them as a framework for other discussions
