The Evolution of Educational Theory in the United States Dickson Mungazi, 1999-01-30 There is no better way to understand a society's assessment of its own success or failure than an examination of its theories of education because any attempt to improve national performance will be reflected in educational policy This study is a comprehensive account of the evolution of American educational theory from the colonial period to the present It includes a broad discussion of the foundations upon which early Americans built their educational policy as well as influential factors unique to the American experience From the Revolution to nineteenth century reform efforts to the turbulent twentieth century educational theory has been adapted to suit the needs of an ever changing multicultural society Throughout U S history key objectives have affected the character of education particularly curriculum One main thrust for reform has been the belief that equality in education serves the national interest Examination of the historical attitudes toward the education of African Americans provides a valuable insight into this process Today America is experiencing significant difficulties in making its educational system succeed and the negative social effects of this deterioration are already apparent The future

success of educational theory lies in international cooperative efforts *Social-philosophical Foundations of Education* Frederick Marshall Schultz,1977 **If Einstein Ran the Schools** Thomas Armstrong Ph.D.,2019-10-11 Many world class thinkers and creators have been concerned about the state of education in the United States Discover their thoughts on how children really learn and what teachers must do to optimally tap children s latent abilities During the last three decades education reformers have pushed standardized testing and policies like No Child Left Behind and Common Core to improve test scores and proficiency in basic skills However during this period that author Thomas Armstrong calls the miseducation of America a number of troubling trends have surfaced including a decrease in creative thinking scores among children in kindergarten through third grade Rather than focus on what s wrong with the education system that has produced these outcomes Armstrong lays out what creative thinkers know about how children should be educated In an extended thought experiment he asks what would happen if we turned the reins of educational policy over not to the politicians and educational bureaucrats but to eminent thinkers and creators like Albert Einstein Pablo Picasso Martin Luther King Jr Rachel Carson Doris Lessing Jane Goodall and other seminal culture builders What might they say about the best way to educate a child If Einstein Ran the Schools suggests that the answers to this intriguing question should guide future efforts to reform our nation s schools The Great American Education-Industrial Complex Anthony G. Picciano,Joel Spring,2013-05-07 The Great American Education Industrial Complex examines the structure and nature of national networks and enterprises that seek to influence public education policy in accord with their own goals and objectives In the past twenty years significant changes have taken place in the way various interest groups seek to influence policies and practices in public education in the United States No longer left to the experience and knowledge of educators American education has become as much the domain of private organizations corporate entities and political agents who see it as a market for their ideas technologies and ultimately profits Picciano and Spring posit that educational technology is the vehicle whereby these separate movements organizations and individuals have become integrated in a powerful common entity and detail how the educational industrial complex has grown and strengthened its position of influence This timely carefully documented well argued book brings together Picciano s perspective and expertise in the field of technology and policy issues and Spring s in the history and politics of education in a unique critical analysis of the education industrial complex and its implications for the future

American Education Joel H. Spring,1988 Education Networks Joel Spring,2012-03-22 Education Networks is a critical analysis of the emerging intersection among the global power elite information and communication technology and schools Joel Spring documents and examines the economic and political interests and forces including elite networks the for profit education industry data managers and professional educators that are pushing the use of ICT for online instruction test preparation and tutoring data management instructional software packages and more and looks closely at the impact this is having on schools students and learning Making a distinction between mind as socially constructed and brain as a

physiological entity Spring draws on recent findings from comparative psychology on the possible effects of ICT on the social construction of the minds of students and school managers and from neuroscience regarding its effect on students brains Throughout the influence of elite networks and powerful interest groups is linked to what is happening to children in classrooms In conclusion Spring offers bold suggestions to change the course of the looming technological triumph of ICT in the brave new world of schooling

Chicana/o Struggles for Education Guadalupe San Miguel, 2013-06-03 Much of the history of Mexican American educational reform efforts has focused on campaigns to eliminate discrimination in public schools However as historian Guadalupe San Miguel demonstrates in *Chicana o Struggles for Education* Activism in the Community the story is much broader and more varied than that While activists certainly challenged discrimination they also worked for specific public school reforms and sought private schooling opportunities utilizing new patterns of contestation and advocacy In documenting and reviewing these additional strategies San Miguel's nuanced overview and analysis offers enhanced insight into the quest for equal educational opportunity to new generations of students San Miguel addresses questions such as what factors led to change in the 1960s and in later years who the individuals and organizations were that led the movements in this period and what motivated them to get involved and what strategies were pursued how they were chosen and how successful they were He argues that while Chicana o activists continued to challenge school segregation in the 1960s as earlier generations had they broadened their efforts to address new concerns such as school funding testing English only curricula the exclusion of undocumented immigrants and school closings They also advocated cultural pride and memory inclusion of the Mexican American community in school governance and opportunities to seek educational excellence in private religious nationalist and secular schools The profusion of strategies has not erased patterns of de facto segregation and unequal academic achievement San Miguel concludes but it has played a key role in expanding educational opportunities The actions he describes have expanded extended and diversified the historic struggle for Mexican American education
