Mba Hr Project Report On Employee Engagement :

Employee Engagement with Sustainable Business Nadine Exter, 2013-07-18 Sustainability is and continues to grow as a key issue for organizations in the board room with investors customers and regulators and from employees whose demands on organizations include improving their social and environmental performance in return for loyalty and commitment However as well as employees being a driver for organizations to embrace corporate sustainability employees are also one of the most critical assets in enabling an organisation to understand and be able to deliver to its economic social and environmental responsibilities Research shows that employees of all types are vital in the pursuit of sustainability however to date there is no one source that shows all of these identified types of employees and how they are involved in the sustainability process This book fills that gap with interviews and case studies for each type of employee as well as up to date research and analysis of the critical role of social intrapreneurs and leaders within organisations The book uses real life examples along with the latest research in an informative and accessible style Management theory is used throughout such as motivation leadership skills and organisational behaviour but this is discussed through examples rather than in a theoretical manner This book will provide insight examples and advice on the different types of employees who are and can contribute to a sustainable world via the organisation they work for what they are doing from within the organization to contribute to societal economic and environmental sustainability

Changing Business from the Inside Out Timothy Mohin, 2017-09-08 Corporate responsibility is considered an oxymoron by much of society Corporations are among the least trusted of our institutions and the 2008 financial crisis BP's oil spill in the Gulf of Mexico and the collapse of the house of cards that was Enron have only added to public skepticism So at a time when trust in corporations has reached an all time low why is interest in corporate responsibility at an all time high A plausible explanation is that increasing numbers of stakeholders are demanding responsibility from corporations Hyper transparency of corporate activities fueled by disclosure laws and the Internet has increased awareness to the point where corporate behavior is under constant scrutiny Smart business leaders are aware of this scrutiny and of the high costs of a public scandal They know that in the long run it is cheaper to act responsibly now than to dig out from a PR disaster later Tim Mohin is a veteran corporate responsibility practitioner who has led programs at Apple Intel and AMD In this book Tim tells us why he believes he is making a difference where it counts and how others can do the same His book is a manual on how to steer the corporate supertanker toward doing good for people and our planet Changing Business from the Inside Out provides a fascinating roadmap to the corporate

responsibility and sustainability field from beginning a career to forming a program to navigating the complicated politics of a corporation Mohin likens the corporate treehugger role to being the designated driver at the corporate cocktail party Throughout his book he argues strongly that activists can accomplish more for the planet and society by serving as a voice of responsibility within the corporation rather than protesting outside the factory gates Corporations are clearly the drivers of the world economy and the corporate responsibility practitioner has an essential role in bringing ethical and sustainable values to the C suite and making sure that they are accomplished Whether you are a practitioner needing advice a mid career professional wanting to change course or an MBA wondering how to incorporate responsibility into your career this book has the answers you need
