Consolidated Edition 2006** International Maritime Organization, 2006 **The International Convention for the Prevention of Pollution from Ships** Henrik Ringbom, Aldo Chircop, 2025-02-12 This Commentary presents an in depth exploration of what is widely regarded as the most important International Maritime Organization IMO convention on vessel source pollution Leading international experts provide an authoritative analysis of the International Convention for the Prevention of Pollution from Ships 1973 78 and its subsidiary instruments collectively known as MARPOL Carbon-Free Shipping and Shipping Carbon Stephen Girvin, Vibe Ulfbeck, 2024-08-22 This book explores the private law implementation of the new international and EU regulatory framework targeting decarbonisation in the shipping industry Compared with other sectors the shipping industry has traditionally been labelled a slow mover concerning the sustainability agenda However new regulatory measures on carbon reduction both internationally and in the EU require fundamentally new developments in the industry This book focuses on the goal of carbon reduction from a private law perspective and considers how the new regulatory framework can be implemented in the shipping industry This book studies existing contractual provisions in charterparties and bills of lading alongside new contractual model clauses designed to facilitate carbon reduction It considers how the new clauses should be interpreted whether they will transform traditional shipping contracts into more collaborative contracts and how they will interact with other clauses in the contract and with other contracts in the supply chain The contractual analysis is considered in context reflecting on enforcement issues such as Port State Control PSC the Poseidon Principles and climate change

litigation The book also analyses the related topic of shipping contracts for carbon storage as a necessary means of meeting carbon reduction targets The book is intended to pave the way for understanding how core shipping contracts can work in this new context and the extent to which the new types of clauses will profoundly transform contracts It presents contributions by experienced and younger academics and practitioners from Asian European and Scandinavian legal systems

Introduction to Ship-to-Ship Transfers for Oil Tankers Alexander Arnfinn Olsen, 2024-10-08 This book provides an outline of the Ship to Ship transfer process and how ship s masters and officers can conduct this inherently dangerous activity safely It is non technical in detail making it an ideal resource for first year students completing their studies in nautical science or as a refresher resource for professionals already employed in the tanker sector Moreover this book would serve as a good handrail for shore based personnel involved in planning and executing ship to ship transfers It would be used a mid range textbook for apprentices officer cadets posted to crude gas carriers Due to its non technical approach accessible style and nature the book would be good resource for students and teachers trainers in the maritime field
