Master Thesis Opportunities For A Sustainable Rural:

The Theory, Practice and Potential of Regional Development Kelly Vodden, David J.A. Douglas, Sean Markey, Sarah Minnes, Bill Reimer, 2019-07-04 Canadian regional development today involves multiple actors operating within nested scales from local to national and even international levels Recent approaches to making sense of this complexity have drawn on concepts such as multi level governance relational assets integration innovation and learning regions These new regionalist concepts have become increasingly global in their formation and application yet there has been little critical analysis of Canadian regional development policies and programs or the theories and concepts upon which many contemporary regional development strategies are implicitly based This volume offers the results of five years of cutting edge empirical and theoretical analysis of changes in Canadian regional development and the potential of new approaches for improving the well being of Canadian communities and regions with an emphasis on rural regions It situates the Canadian approach within comparative experiences and debates offering the opportunity for broader lessons to be learnt This book will be of interest to policy makers and practitioners across Canada and in other jurisdictions where lessons from the Canadian experience may be applicable At the same time the volume contributes to and updates regional development theories and concepts that are taught in our universities and colleges and upon which future research and analysis will build **Evolution of New**

Working Spaces Ilaria Mariotti, Elisabete Tomaz, Grzegorz Micek, Carles Méndez-Ortega, 2024-02-27 This open access book provides multidisciplinary perspectives on the changing dynamics of new working spaces with insights from various European countries and observing critical theoretical approaches Divided into two main parts the first part focuses on the different typologies of new working spaces identifying the changing nature of these spaces and associated concepts taxonomies and specific approaches to this phenomenon The second part analyzes the location of new working spaces examining its recent evolution and identifying new factors and geographies offering an additional empirical analysis of different European realities The research included in this book contributes to the current discussion of new forms and geographies of work and their impact on the territories and related policies *Linking agriculture and tourism to*

strengthen agrifood systems in Asia and the Pacific Food and Agriculture Organization of the United Nations, 2023-08-03 Agrifood systems in Asia and the Pacific can be strengthened by tapping on agrifood tourism linkages When tourism and agrifood systems interact both synergies and competition appear Agriculture and tourism compete between themselves and other sectors for land water labour capital and transport and logistics services Cross sectoral synergies arise when agriculture and tourism influence each other through their respective demand conditions and changes in the enabling environment These cross sectoral synergies can be instrumental in strengthening agrifood systems in the region and addressing interlinked crises in the post pandemic era Governments across Asia and the Pacific have acknowledged the potential of tapping into agrifood tourism linkages to advance sustainable development in both urban food tourism and rural

areas mostly agricultural tourism and are implementing efforts to develop this subsector Agrifood tourism linkages can create income generating opportunities for farmers and tourism operators boost employment and stimulate overall economic growth promote the development of sustainable agrifood systems prevent rural youth outmigration and help preserve culinary and agricultural heritage This publication guides policymakers in the region in the preparation of a strategic plan aimed at developing agrifood tourism and the tourism food value chain as drivers of sustainable development The successful positioning of a country or location as a culinary or agricultural tourism destination and the creation of synergies between the agriculture and tourism sectors requires a shared vision and coordination between policymakers destination managers tourism and agrifood businesses chefs farmers and other key stakeholders

The Emerging Policy for Green Economy and Social Development in Limpopo, South Africa Agnes Musyoki,2012 This paper evaluates the emerging green economy in South Africa using ideas from the concept of sustainable rural livelihoods which are intimately connected to ecological services many developing countries It finds that African communities and governments are prioritising green economy for job creation poverty alleviation and reducing inequalities while addressing global environmental concerns What remains problematic however is how these objectives are to be achieved The paper argues that one of the key challenges in South Africa is the gap between policy and implementation of sustainable development the Millennium Development Goals and other globally driven initiatives The paper emphasises that green economy policy needs to consider poverty reduction and women s empowerment in order to promote rural sustainable development Publisher description
