The Piano Albert Ernest Wier, 1940 **20th Century Music**, 1999 **Creative Research in Music** Anna Reid, Neal Peres Da Costa, Jeanell Carrigan, 2020-12-29. *Creative Research in Music* explores what it means to be an artistic researcher in music in the twenty-first century. The book delineates the myriad processes that underpin successful artistic research in music, providing best practice exemplars ranging from Western classical art to local indigenous traditions and from small to large-scale multi-media and cross-cultural work formats. Drawing on the richness of creative research work at key institutions in South East Asia and Australia, this book examines the social, political, historical and cultural driving forces that spur and inspire excellence in creative research, to extend and to cross boundaries, to sustain our music industry, to advocate for the importance of music in our world and to make it clear that music matters. In the chapters, our authors present the ideas of

informed practice innovation and transcendence from diverse international perspectives Each of these three themes has an introductory section where the theme is explored and the chapters in that section introduced Taken as a whole the book discusses how the themes in combination with reference to the authorial group are able to transform music pedagogy and performance for our global and complex world Chapter 9 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license

The Gramophone, 1994 [The Art of Music](#) Daniel Gregory Mason, 1917 [Obiter Dicta](#) Erick Verran, 2021 Stitched together over five years of journaling *Obiter Dicta* is a commonplace book of freewheeling explorations representing the transcription of a dozen notebooks since painstakingly reimaged for publication Organized after Theodor Adorno's *Minima Moralia* this unschooled exercise in aesthetic thought gleefully dilettantish oftentimes dangerously close to the epigrammatic interrogates an array of subject matter although inescapably circling back to the curiously resemblant histories of Western visual art and instrumental music through the lens of drive by speculation Erick Verran's approach to philosophical inquiry follows the brute force literary technique of Jacques Derrida to exhaustively favor the material grammar of a signifier over hand-me-down meaning juxtaposing outer semblances with their buried systems and our etched-in-stone intuitions about color and illusion shape and value with lessons stolen from

seemingly unrelatable disciplines Interlarded with extracts of Ludwig Wittgenstein but also Wallace Stevens Cormac McCarthy as well as Roland Barthes this cache of incidental remarks eschews what s granular for the biggest picture available leaving below the hyper specialized fields of academia for a bird s eye view of their crop circles Obiter Dicta is an unapologetic experiment in intellectual dot connecting that challenges much long standing wisdom about everything from illuminated manuscripts to Minecraft and the evolution of European music with lyrical brevity that is before jumping to the next topic
