The chapter is devoted to measuring the characteristics of a neighborhood, which is the primary step to identifying its possible relation to the crime episodes that occur in the location. The authors seek to describe the process of measurement as directly and specifically as possible to compensate for the lack of precision; the procedure, according to them, is quite difficult, hence approximate results. The opening part, therefore, contains the interpretation of the terms that are used for characterizing a neighborhood, including recidivism, which is essential for improving specificity. Then, the authors comment on the indicators and dimensions that serve as a reference point for classifying a crime by its seriousness, in which section an essential point is the types of harm to the victim. At this stage, the vagueness of the terms, which results in the measurement result, is highlighted.

Regarding the actual procedure of characterization, the authors describe several approaches to it theoretically and give practical examples for additional demonstrativeness. These are, in particular, scoring, exhaustive and exclusive measurement, which techniques apply a set of variables that also are specified in the chapter. The next point on which the authors focus is the criteria for assessing the quality of measurement; an important nuance is that section is the difference between precision and accuracy. Strategic Thinking in Complex Problem Solving Arnaud Chevallier, 2016-07-06 Whether you are a student or a working professional you can benefit from being better at solving the complex problems that come up in your life. Strategic Thinking in Complex Problem Solving provides a general framework and the necessary tools to help you do so. Based on his groundbreaking course at Rice University, engineer and former strategy consultant Arnaud Chevallier provides practical ways to develop problem solving skills such as investigating complex questions with issue maps, using logic to promote creativity, leveraging analogical thinking to approach unfamiliar problems, and managing diverse groups to foster innovation. This book breaks down the resolution process into four steps: 1. frame the problem, identifying what needs to be done; 2. diagnose it, identifying why there is a problem or why it hasn't been solved yet; 3. identify and select potential solutions, identifying how to solve the problem; and 4. implement and monitor the solution, resolving the problem. For each of these four steps, the what, why, how, and do this book explains techniques that promote success and demonstrates how to apply them on a case study and in additional examples. The featured case study guides you through the resolution process, illustrates how these concepts apply, and creates a concrete image to facilitate recollection. Strategic Thinking in Complex Problem Solving is a tool kit that integrates knowledge based on both theoretical and empirical evidence from many disciplines and explains it in accessible terms. As the book guides you through the various stages of solving complex problems, it also provides useful templates so that you can easily apply these approaches to your own personal projects. With this book, you don't just learn about problem solving, but how to actually do it.

**Youth Violence and Delinquency** Frank P. Williams, Marilyn D. McShane, 2007-05-30 Juvenile crime and violence has always piqued the public's interest. Indeed, each generation of Americans tends to define the youth crime problem as more serious than any previous generation. Even though juvenile homicides have been decreasing since the mid 1990s, the media is still quick to provide dramatic examples of juvenile monsters who are terrorizing their communities. Shootings at school, gang banging, and trafficking drugs, school bullies, and charging juveniles as adults are subjects that have recently received wide media coverage. This three volume set on the nature, incidence, consequences, and treatment of youth crime and violence will help readers understand the true nature of youth crime and violence from a variety of perspectives. Each volume covers a different area, and experts write on topics ranging from sex offending to fire starting, from gangs to guns, from juvenile probation to charging youths as adults, from mandatory mental health treatment to

police in school settings and more What drives a teenager to steal To kill Why does youth crime and violence occur Why are youths such vulnerable targets What can be done to stop youth offenders and what can be done to help youthful victims How does the criminal justice system respond What do communities do to punish and protect youths What can schools do to intervene All these questions and more are answered in this set on this timely and important topic Our youth are our most precious commodity and protecting vulnerable children as well as helping offenders is of paramount importance for steering them toward safe and productive lives These volumes help readers better understand the causes and consequences of youth violence and crime and consider ways to address the problems *Research Methods for Criminal Justice* Michael G.

Maxfield, Earl R. Babbie, 1995 Adapted from Earl Babbie's best selling research methods text this book is written specifically for criminal justice and criminology students It presents clear practical example filled discussions and applications of the major methods in criminal justice research in an informal conversational writing style that diffuses student anxiety

Violence Margaret Zahn, Henry Brownstein, Shelly Jackson, 2014-09-25 Brings together theoretical and empirical papers prepared by noted researchers and theoreticians The first part includes chapters by criminological theorists who apply their theory of crime particularly to violence The second part contains chapters by researchers who look at the substantive area of their expertise through the lens of theories of violence Each chapter is original and was written specifically for this book

For the Common Good R. Robin Miller, Sandra Lee Browning, 2004 The passing of the Patriot Act in 2001 brought the tension between individual citizen's rights and governmental control to the forefront of American political discourse It seems that the state by claiming that they are increasing our collective security is in actuality operating against the common good More than anything else recent events highlight the need for texts such as *For the Common Good* This book is the culmination of research that investigated such topics as race class gender and sexuality violence and victimization prostitution employee drug testing hate speech legislation women processed by the criminal justice system the war on drugs and the war on crime All the pieces come from a critical perspective and some of them are written from a Marxian perspective All of the papers on the volume rely at least tacitly on the notions that reality is constructed deviance is created by the normative order and that the power that some groups have over that of others lies at the heart of societal social control A key point of strength in this anthology is the methodological nature of the papers included Most of the pieces are based on original research using various methodologies Several theoretical pieces such as Bruce Arrigo's *Law Crime and Social Control Making Sense of Conflict Radical and Postmodern Criminology* and Andrew Taslitz's *The Jury and the Common Good Synthesizing the Insights of Modern and Postmodern Legal Theories* are included ensuring a more balanced approach The cross disciplinary nature of the work included here is a further advantage of this text The papers in *For the Common Good* include works by professionals from the fields of sociology criminology criminal justice public policy studies psychology and law And because nothing is as separate as two mounds of expertise efforts to bridge disciplinary gaps are critical Finally

given our volatile political times where personal rights and freedoms are weighed against national security and found wanting on nearly a daily basis a rearticulation and further emphasis on a critical examination of law and social control appears urgent Editors Miller and Browning seek to respond to this need
