Meccanica Razionale:

Mechanical Systems, Classical Models Petre P. Teodorescu, 2007-06-06 In the study of a science of nature mathematics plays an important role Mechanics is the first science of nature which was expressed in terms of mathematics by considering various mathematical models associated to phenomena of the surrounding nature Thus its development was influenced by the use of a strong mathematical tool on the other hand we must observe that mechanics also influenced the introduction and the development of many mathematical notions In this respect the guideline of the present book is precisely the mathematical model of mechanics A special accent is put on the solving methodology as well as on the mathematical tools used vectors tensors and notions of field theory Continuous and discontinuous phenomena various mechanical magnitudes are presented in a unitary form by means of the theory of distributions Some appendices give the book an autonomy with respect to other works special previous mathematical knowledge being not necessary Some applications connected to important phenomena of nature are presented and this also gives one the possibility to solve problems of interest from the technical engineering point of view

Algebraic Geometry between Tradition and Future Gilberto Bini, 2023-05-05 An incredible season for algebraic geometry flourished in Italy between 1860 when Luigi Cremona was assigned the chair of Geometria Superiore in Bologna and 1959 when Francesco Severi published the last volume of the treatise on algebraic systems over a surface and an algebraic variety This century long season has had a prominent influence on the evolution of complex algebraic geometry both at the national and international levels and still inspires modern research in the area Algebraic geometry in Italy between tradition and future is a collection of contributions aiming at presenting some of these powerful ideas and their connection to contemporary and if possible future developments such as Cremonian transformations birational classification of high dimensional varieties starting from Gino Fano the life and works of Guido Castelnuovo Francesco Severi's mathematical library etc The presentation is enriched by the viewpoint of various researchers of the history of mathematics who describe the cultural milieu and tell about the bios of some of the most famous mathematicians of those times

Geometry and Complex Variables S. Coen, 1991-06-03 This reference presents the proceedings of an international meeting on the occasion of the University of Bologna's ninth centennial highlighting the latest developments in the field of geometry and complex variables and new results in the areas of algebraic geometry differential geometry and analytic functions of one or several complex variables Building upon the rich tradition of the University of Bologna's great mathematics teachers this volume contains new studies on the history of mathematics including the algebraic geometry work of F Enriques B Levi and B Segre complex function theory ideas of L Fantappie B Levi S Pincherle and G Vitali series theory and logarithm theory contributions of P Mengoli and S Pincherle and much more Additionally the book lists all the University of Bologna's mathematics professors from 1860 to 1940 with precise indications of each course year by year Including survey papers on combinatorics complex analysis and complex algebraic geometry inspired by Bologna's mathematicians and current
