donors during this period The conclusions reached are based on field visits interviews and a review of documents and literature The picture that emerges is one of considerable diversity of activities and experiences from which it is not easy to generalize However the overall conclusion is that after slow halting and sometimes faulty starts the Bank has become progressively more effective in this field From this point forward most of what is needed involves reorientations and shifts in emphasis rather than radical departures from recent practices and levels of funding     *Foot & Ankle International* ,2008
