The Ultimate Guide for Brand New Investors & Traders Richard Christopher, This book is written for brand new aspiring day traders who have zero experience and are looking for the information they need to get started the right way from the first day If you are already trading real money having great success I encourage you to keep it going this book is going to be very elementary for you This book is the bible for brand new investors and traders who need to start somewhere This is the place What you will learn in this book will fast track your knowledge of what you need to know to get started learning You can perhaps go from knowing 0 to trading and making real money in the live markets in as little as 30 days to a couple of months if you do what it says in this book This time frame is not etched in stone and may well take you less or more time depending on how fast you grasp the basic principles of this book and how fast you can employ them in a live market environment with real money If you would like to learn to trade and invest in the markets any markets and trade and invest in them the right way from the very start of your trading and investing education career then I highly recommend you pay attention and do what it says in this book If you are a brand new beginner you should read every single page in this book Multiple times if need be This book is meant to expedite your learning curve which can sometimes be long and costly Sure you can Google this or that information however it would take you many years to learn what I am going to tell you in this book before you could invest any of your hard earned real money in the live markets and have a chance making real money This first book in the series is meant to give you the basic information you need to make a decision as to whether to get into this business or not You can screw around and waste a lot of training and education time on things that won't help you to make money in the live market or you can learn to trade by focusing on the reality of how markets work and how money is really made and lost in markets This means quantifying real demand and supply in a market and then buying low and selling high just like you do in everyday in

every other part of life buying at wholesale and selling at retail The live market is no different Do you want to make money right away in the live market or waste time and perhaps A LOT OF MONEY on doing things the wrong way from the start the cost of which can be steep and be an account killer and no one wants that right I have written this book in a way I feel the progression of information should be learned to be able to go into the live markets with confidence and no fear The principles in this book can be used in any liquid market on any time frame it does not matter This is what makes the information so valuable By the time you are finished with this book you should have learned the following What money management is and why you need to learn it first Why you need to master your own psychology to work in the live market Why you must always work with a rule based plan You will have learned to quantify and monetize fear Read this book study hard go in the market and get your money Money Is Power! Kimon Socrates Inglessis, 2015-11-26 We all have the same goal when we make an investment maximizing profits while limiting losses The goal of this book is to help novice and beginning traders to understand the markets and to explore ways of maximizing profits while limiting losses while trading the stock market The novice trader has more questions than they even know they have Maybe they know about limit orders but not stop limits or the bid or the ask This is why this book tries to begin at the beginning and quickly explain the important aspects while not getting bogged down in too much needless detail Analogies and clear examples are used throughout the book to help to explain the different topics and critical charting interactions that can seem random at first but tend to follow certain patterns With over 100 graphics pulled from real world charts used as examples including a technical analysis of the chart you can follow many company s stocks and see how the technical predictions developed in the months and years since the book was written If you have wondered how the stock market works and how you can trade profitably with a less risk of loosing your money then congratulations Today you have begun your journey of discovery that can lead to a literal pot of gold at the end of a ticker tape rainbow Is it an easy journey No it isn t easy but it is not impossible either and who ever heard of a pot of gold that is easy to gain access to Trading stocks is not for the faint hearted or mentally lazy and those with poor discipline will have even more to learn than will the natural Zen Master However with practice even the worst trader can learn to fix their mistakes and capitalize on their own strengths By noting entry and exit points and reasons for making each trade you can analyze your good trades and also any mistakes We learn more from our mistakes than our successes Never fear failure learn from the attempt and note the results and then incorporate the lessons learned in the next attempt You will see how you can develop your own trading strategy using the zero risk method of online trading games or paper trading Even an experienced trader should use practice trading when trying a new strategy or trade setup until they can regularly trade it for gains Once a repeatable setup has been successfully traded profitably by using an online trading game or simulator multiple times then you can look to trade that same setup with a small real money position when it next appears When first trading with actual money it is best to trade only a small position until you can limit losses and make consistent gains Only when you

can limit losses and make consistent gains should you consider increasing the dollar size of your trades We are seeking repeatable setups and signals that can signal profitable trades while keeping our risks as low as possible We then want to practice the same setup until we can return consistent gains and limit any losses The stock market is a chaotic environment at best so we need to simplify anything that we can and remain focused on the critical pieces of information The main goal should also stay in focus maximizing profits while limiting losses [Online Trading Masterclass Alpha Bull](#)
