Hierarchical Linear Models Stephen W. Raudenbush, Anthony S. Bryk, 2002 New edition of a text in which Raudenbush U of Michigan and Bryk sociology U of Chicago provide examples explanations and illustrations of the theory and use of hierarchical linear models HLM New material in Part I Logic includes information on multivariate growth models and other topics *Interaction Effects in Linear and Generalized Linear Models* Robert L. Kaufman, 2018-09-06 Offering a clear set of workable examples with data and explanations *Interaction Effects in Linear and Generalized Linear Models* is a comprehensive and accessible text that provides a unified approach to interpreting interaction effects The book develops the statistical basis for the general principles of interpretive tools and applies them to a variety of examples introduces the ICALC Toolkit for Stata downloadable from the Robert L Kaufman s website and offers a series of start to finish application examples to show students how to interpret interaction effects for a variety of different techniques of analysis beginning with OLS regression The data sets and the Stata code to reproduce the results of the application examples are available online

Spatial Regression Models for the Social Sciences Guangqing Chi, Jun Zhu, 2019-03-06 *Spatial Regression Models for the Social Sciences* shows researchers and students how to work with spatial data without the need for advanced mathematical statistics Focusing on the methods that are commonly used by social scientists Guangqing Chi and Jun Zhu explain what each method is and when and how to apply it by connecting it to social science research topics Throughout the book they use the same social science example to demonstrate applications of each method and what the results can tell us **Regression**

Analysis Richard A. Berk, 2004 Richard Berk identifies a wide variety of problems with regression analysis as it is commonly used and then provides a number of ways in which practice could be improved **Structural Equation Modeling** David Kaplan, 2008-07-23 Using detailed empirical examples *Structural Equation Modeling* Second Edition presents a thorough and sophisticated treatment of the foundations of structural equation modeling SEM It also demonstrates how SEM can provide a unique lens on the problems social and behavioral scientists face Intended Audience While the book assumes some knowledge and background in statistics it guides readers through the foundations and critical assumptions of SEM in an easy to understand manner *Propensity Score Analysis* Shenyang Guo, Mark W. Fraser, 2015 Provides readers with a systematic review of the origins history and statistical foundations of Propensity Score Analysis PSA and illustrates how it can be used for solving evaluation and causal inference problems *Hierarchical Linear Models* Anthony S. Bryk, Stephen W.

Raudenbush, 1992 *Hierarchical Linear Models* launches a new Sage series *Advanced Quantitative Techniques in the Social Sciences* This introductory text explicates the theory and use of hierarchical linear models HLM through rich illustrative examples and lucid explanations The presentation remains reasonably nontechnical by focusing on three general research purposes improved estimation of effects within an individual unit estimating and testing hypotheses about cross level effects

and partitioning of variance and covariance components among levels This innovative volume describes use of both two and three level models in organizational research studies of individual development and meta analysis applications and concludes with a formal derivation of the statistical methods used in the book

Models for Social Networks With Statistical Applications Suraj Bandyopadhyay,A R. Rao,Bikas K. Sinha,2011 The study of social networks is a new but fast widening multidisciplinary area involving social mathematical statistical and computer sciences for application in diverse social environments in the latter sciences and specially for the field of Economics It has its own parameters and methodological tools In Models for Social Networks with Statistical Applications the authors show how graph theoretic and statistical techniques can be used to study some important parameters of global social networks and illustrate their use in social science studies with some examples in real life survey data
