More and Better Jobs in South Asia The World Bank, 2011-12-20 South Asia has created nearly 800 000 jobs per month during the last decade Robust economic growth in large parts of the region has created better jobs those that pay higher wages for wage workers and reduce poverty for the self employed the largest segment of the region's employed Going forward South Asia faces the enormous challenge of absorbing 1 to 1.2 million entrants to the labor force every month for the next two decades at rising levels of productivity This calls for an agenda that cuts across sectors and includes improving the reliability of electricity supply for firms in both urban and rural settings dealing decisively with issues of governance and corruption making access to land easier for urban informal firms and strengthening transport links between rural firms and their markets It requires improving nutrition in early childhood to avoid cognitive impairment intensifying the focus on quality of learning in education systems equipping workers with the skills that employers demand and reorienting labor market regulations and programs to protect workers rather than jobs The continuance of high economic growth to help improve job quality is not assured But the region's demography can provide a favorable tailwind The growth of workers exceeds that of dependents in much of the region The resources saved from having fewer dependents can be shifted to high priority investments in physical and human capital accumulation necessary to create

productive jobs in countries with an enabling policy framework But the demographic window of opportunity is open for only the next three decades a fact which lends urgency to the reform agenda This book will be of interest to policy makers their advisers researchers and students of economics who seek solutions not only to the challenge of creating more and better jobs in South Asia but globally as well It is the first title in South Asia Development Matters a new series that will serve as a vehicle for in depth synthesis of economic and policy analysis on key development topics for South Asia **YSEC Yearbook of Socio-Economic Constitutions 2022** Eva Storskrubb,2023-10-12 Funding of justice has significant consequences for the enforcement of rights and impacts directly on access to justice and the right to a fair trial as constitutional rights Access to justice in turn essentially impacts on the effective enjoyment of any other constitutional right since having the actual means to access a court in case of a potential breach strengthens that right Public funding such as legal aid has come under pressure due to the reality of financial austerity measures and the tightening public budgets in many countries This has contributed to privatization and marketisation of funding in ever more jurisdictions Private forms of funding include inter alia litigation insurance third party litigation finance and crowdfunding as well as different forms of assigning or selling claims As public funding is in decline and as market liberalization in the field of justice increases crucial questions related to the rule of law access to justice and social and economic development in the intersection between states citizens and business are raised For example potential questions of conflict of interest and how to ensure a basic level of equality of access to funding whilst at the same time protecting market freedom Some of the contributions in the volume deal with the consequences of privatization of funding of justice on access to justice from a general principled and theoretical perspective Other contributions deal with specific regulatory developments or issues at the EU level alternatively at the local level in specific jurisdictions Further contributions deal with crucial issues of funding of justice in environmental matters that are increasingly relevant and topical in practice The Economics of Growth and Development ,1995-01-01 This important volume brings together 17 major essays written over the last 25 years in the field of growth and development Many of the papers make pioneering contributions while others are more reflective and eclectic
