Teacher Training for English-Medium Instruction in Higher Education Sánchez-Pérez, Maria del Mar, 2020-02-07 English medium instruction (EMI) has become a pervasive teaching model in recent higher education. The implementation of EMI programs requires changes in university teaching methods since most lecturers need to adapt their contents and the way they teach them to successfully work in foreign language environments. The rapid proliferation of such programs has resulted in concern among teaching staff who have felt pushed towards teaching their subject content through a non-native language with little or no previous training. As a result, many recent studies have highlighted the importance and urgency to train teaching staff in terms of language proficiency and the appropriate teaching methods, techniques and strategies to be applied in EMI lessons. *Teacher Training for English Medium Instruction in Higher Education* is an academic research publication that provides comprehensive research on effective approaches and experiences in teacher training for EMI at universities both in terms of language skills and teaching methodologies and that analyzes the design and development of comprehensive teacher training programs that successfully engage these EMI programs. It has profound implications for the development of the international profile of higher education institutions as it provides information on how to train highly qualified lecturers to successfully teach students from different nationalities. Featuring a wide range of topics such as assessment, curriculum design and learning styles, this book is ideal for pre- and in-service teachers, language specialists, content specialists, administrators, deans, higher education faculty, researchers, practitioners, curriculum designers, policymakers, academicians and students. *International Encyclopedia of Education*, 2009-04-17 The field of education has experienced extraordinary technological, societal and institutional change in recent years, making it one of the most fascinating yet complex fields of study in social science. Unequalled in its combination of authoritative scholarship and comprehensive coverage, *International Encyclopedia of Education* Third Edition succeeds two highly successful previous editions (1985, 1994) in aiming to encapsulate research in this vibrant field for the twenty-first century reader. Under development for five years, this work encompasses over 1,000 articles across 24 individual areas of

coverage and is expected to become the dominant resource in the field Education is a multidisciplinary and international field drawing on a wide range of social sciences and humanities disciplines and this new edition comprehensively matches this diversity The diverse background and multidisciplinary subject coverage of the Editorial Board ensure a balanced and objective academic framework with 1 500 contributors representing over 100 countries capturing a complete portrait of this evolving field A totally new work revamped with a wholly new editorial board structure and brand new list of meta sections and articles Developed by an international panel of editors and authors drawn from senior academia Web enhanced with supplementary multimedia audio and video files hotlinked to relevant references and sources for further study Incorporates ca 1 350 articles with timely coverage of such topics as technology and learning demography and social change globalization and adult learning to name a few Offers two content delivery options print and online the latter of which provides anytime anywhere access for multiple users and superior search functionality via ScienceDirect as well as multimedia content including audio and video files

Competition Overdose Maurice E. Stucke, Ariel Ezrachi, 2020-03-17 Using dozens of vivid examples to show how society overprescribed competition as a solution and when unbridled rivalry hurts consumers kills entrepreneurship and increases economic inequality two free market thinkers diagnose the sickness caused by competition overdose and provide remedies that will promote sustainable growth and progress for everyone not just wealthy shareholders and those at the top Whatever illness our society suffers competition is the remedy Do we want better schools for our children Cheaper prices for everything More choices in the marketplace The answer is always Increase competition Yet many of us are unhappy with the results We think we re paying less but we re getting much less Our food has undeclared additives or worse our drinking water contains toxic chemicals our hotel bills reveal surprise additions our kids schools are failing our activities are tracked so that advertisers can target us with relentless promotions All will be cured we are told by increasing the competitive pressure and defanging the bloated regulatory state In a captivating expos Maurice E Stucke and Ariel Ezrachi show how we are falling prey to greed chicanery and cronyism Refuting the almost religious belief in rivalry as the vehicle for prosperity the authors identify the powerful corporations lobbyists and lawmakers responsible for pushing this toxic competition and argue instead for a healthier even nobler form of competition Competition Overdose diagnoses the disease and provides a cure for it
