By Jim Collins Morten T Hansen Great By Choice Uncertainty Chaos And Luck Why Some Thrive Despite Them All:

Great by Choice Jim Collins, Morten T. Hansen, 2011-10-11 The new question Ten years after the worldwide bestseller Good to Great Jim Collins returns with another groundbreaking work this time to ask Why do some companies thrive in uncertainty even chaos and others do not Based on nine years of research buttressed by rigorous analysis and infused with engaging stories Collins and his colleague Morten Hansen enumerate the principles for building a truly great enterprise in unpredictable tumultuous and fast moving times The new study Great by Choice distinguishes itself from Collins's prior work by its focus not just on performance but also on the type of unstable environments faced by leaders today With a team of more than twenty researchers Collins and Hansen studied companies that rose to greatness beating their industry indexes by a minimum of ten times over fifteen years in environments characterized by big forces and rapid shifts that leaders could not predict or control The research team then contrasted these 10X companies to a carefully selected set of comparison companies that failed to achieve greatness in similarly extreme environments The new findings The study results were full of provocative surprises Such as The best leaders were not more risk taking more visionary and more creative than the comparisons they were more disciplined more empirical and more paranoid Innovation by itself turns out not to be the trump card in a chaotic and uncertain world more important is the ability to scale innovation to blend creativity with discipline Following the belief that leading in a fast world always requires fast decisions and fast action is a good way to get killed The great companies changed less in reaction to a radically changing world than the comparison companies The authors challenge conventional wisdom with thought provoking sticky and supremely practical concepts They include 10Xers the 20 Mile March Fire Bullets Then Cannonballs Leading above the Death Line Zoom Out Then Zoom In and the SMaC Recipe Finally in the last chapter Collins and Hansen present their most provocative and original analysis defining quantifying and studying the role of luck The great companies and the leaders who built them were not luckier than the comparisons but they did get a higher Return on Luck This book is classic Collins contrarian data driven and uplifting He and Hansen show convincingly that even in a chaotic and uncertain world greatness happens by choice not chance **Run It Like a Business**

Teaching by Heart Thomas J. DeLong,2020-01-14 The best teachers are leaders and the best leaders are teachers Teaching by Heart summarizes the

author's key insights gained from more than forty years of teaching and managing. It illustrates how teachers can both lift people up and let them down. It proposes that the best teachers are also leaders and the best leaders are also teachers. In examining how to lead and teach, renowned Harvard Business School professor Thomas J. DeLong takes the reader inside his own head and heart. He notes that as teachers we often focus more on our inadequacies and missteps than on our strengths and unique talents. He explains why this is so by dissecting and analyzing his own experiences using himself as a case study. The book's goal is to help readers learn about the intricacies of teaching and managing and to impart lessons about how teachers can create a unique teaching atmosphere. To do this, the author analyzes the process of creating a curriculum, preparing for an eighty-minute class, managing the fifteen minutes before class begins, and evaluating the nature of the teaching experience after the session concludes. Along the way, he connects specific classroom behaviors with leadership issues in organizations, in teams, and in personal relationships. He also asks and answers some provocative questions such as: What happens on multiple levels when I teach or lead with my students or professionals? What am I thinking and feeling as I process what students are thinking and feeling? How are my internal conversations affecting how I teach and lead? How do I manage my biases, including having favorite students? To what extent can I use teaching methods in the arena of management? Throughout *Teaching by Heart*, DeLong discusses why empathy and authenticity matter. When teachers embrace this mindset, students have the opportunity to have a unique learning experience. Teachers and managers will learn how to create moments of transformation for students. Whether you're a university professor, a student, a business leader, or just someone fascinated by teaching, this book will instruct, entertain, and hopefully inspire.

Committed Teams Mario Moussa, Madeline Boyer, Derek Newberry, 2016-03-07. Build high-performing teams with an evidence-based framework that delivers results. *Committed* is a practical handbook for building great teams. Based on research from Wharton's Executive Development Program (EDP), this concise guide identifies the common challenges that arise when people work together as a group and provides key guidance on breaking through the barriers to peak performance. *Committed* draws its insights from the EDP's living lab, an intensive two-week simulation during which executive-level participants run complex global businesses. The authors have observed over 100 teams collaborating and competing for over 100 combined years in this intense environment. It has yielded fundamental insights about teamwork: what usually goes wrong, what frequently goes right, and the methods and techniques that will help you access your team's full potential. These insights have been distilled into a simple, repeatable process that you can start applying today. Getting teams engaged and aligned is hard. *Committed* will give you the tools you need to deal with all of the familiar teamwork challenges that get in the way: organizational politics, delegation, coordination, and aligning skills and motivation. Using vivid stories and examples from the worlds of business, sports, and nonprofits, it will teach you how to understand the dynamics of successful teams, achieve peak performance using a research-backed methodology, gain expert insight into why most teams underperform, and learn the critical points common to all great teams.

Committed gives you the perspective you need to combine the right people with the right way of collaborating to achieve extraordinary results **Thinking Bigger** Sarah Dusek, 2024-09-02 A guide for women entrepreneurs to help them get the financing they need to build big businesses and change our world The lack of female representation among top earning business founders is surprising when compared with the number of women who start businesses Fewer than thirty women in history have taken companies they founded public on leading stock exchanges Although consistent references to women and small business dominate global development strategies and influence public policy women are granted less than 2 percent of all venture capital investments annually Thinking Bigger is designed to provide women with the keys to unlocking capital and thinking bigger Its author Sarah Dusek an entrepreneur and a venture capitalist shares personal anecdotes highlighting obstacles that women face in business and how to overcome them She reveals the metrics that really matter to venture capitalists and how to pitch them successfully Her book delves into the art and science of creating a winning pitch deck the standard formula for pitching to investors from crafting a compelling story to using data and design to make a lasting impact Thinking Bigger positions women to get the financing they need to build big businesses to scale their endeavors and to make a positive impact on our world
