The Oxford History of English Lexicography:

Specialized dictionaries Anthony Paul Cowie,2009 These substantial volumes present the fullest account yet published of the lexicography of English from its origins in medieval glosses through its rapid development in the eighteenth century to a fully established high tech industry that is as reliant as ever on learning and scholarship The history covers dictionaries of English and its national varieties including American English with numerous references to developments in Europe and elsewhere which have influenced the course of English lexicography from publisher description

Getting at GET in World Englishes Elisabeth Bruckmaier,2017-02-20 Despite its exceptional frequency and versatility GET has never been a focus of research in its entire variability which goes from lexical to grammatical uses nor in large amounts of data from different varieties of English The present corpus based study deals with over 11 600 tokens of GET in written and spoken language from three varieties of English and thus provides new insights for variationist linguistics Firstly it offers a comprehensive semasiological syntactic analysis of GET i e an analysis of all its meanings and all the constructions into which it enters suggesting ten categories as being necessary for its complete description Secondly it contributes to the understanding of factors that are at work in variation in World Englishes and lead to quantitative differences between regional standard varieties Thus the present study demonstrates that the use of GET in the New Englishes analysed is less affected by substrate effects than by the effects of Second Language Acquisition and the varying influence of British and American English norms Moreover it can be shown that the New Englishes display more grammatical uses of GET than does British English

Phraseology in English Academic Writing Peter Andrew Howarth,1996 This study examines the use of one category of prefabricated language restricted lexical collocations in native and non native academic English in the social sciences in an attempt to throw light on a neglected aspect of learner competence It first

surveys the existing theoretical viewpoints on word combinations and then reviews experimental research into the psycholinguistic processing of prefabricated language which suggest that the role of conventional expressions is to facilitate fluent production and rapid comprehension A computer based corpus of native academic writing is analysed to discover to what extent and how such collocations are used in formal written English Conventionality of style it is suggested aids precision of expression clearly a quality highly valued in academic argument A corpus of non native writing is then subjected to a similar analysis While the collocational errors learners make do not on the whole seriously destroy intelligibility they can lead to a lack of precision and obscure the clarity of expression required in academic communication Pedagogical implications are then considered and it is seen that for the most part published teaching materials have failed to recognize the nature of collocations in general and offer little help The final part of the study examines the treatment of restricted collocations in both general and phraseological dictionaries for learners These are evaluated on their selection and presentation of collocations shown by the preceding research to be problematic for advanced learners The conclusion suggests that for such learners who are mostly studying the language independently good reference works are needed in the form of specialist collocational dictionaries The results of this research help to establish principles for the design of such dictionaries
