modern democratic state to the experience of an academia with online examination we have tried to include every possible aspect of e government Paper authored by Dr Hoff Maarten aims to outline the role of e governance within the setting of a local government in a modern democratic state It is agreed that a local governmental organization needs to be fit for the purpose of serving its citizens Fits can be tested both through universally acknowledged principles and drivers that suit modern on demand organizations Paper authored by Mr Alsaheed Abraheem and Dr Carl proposes a conceptual framework which captures the main factors both enablers and barriers influence and contributes toward a successful implementation of eServices in countries that have unstable status The paper draws upon Osborn and Gaebler s work reinventing government which identifies 10 principles of government transformation This is used to examine eGov examples in the case of Syria along with previous work covering barriers and enablers to eGov activities within countries that have unstable status The resulting derived conceptual framework provides a base to understand eGov activity for nations going through geopolitical uncertainty Paper authored by Mr Saurabh Chandra highlights the initiatives taken by the Governments in India at various levels to modernise their processes and functions for delivery of information and services to the citizens using the Information and Communication technology ICT It also highlights E Government uptake in different parts of the world highlighting its need in India as in developing countries like India there is no comprehensive data on actual e government uptake on a global scale Paper authored by Mr Peter Asare Nuamah and Mr Darko Emmanuel Agyepong highlights the various legal policies and framework that support e governance in Ghana as well as the challenges of implementing e governance initiatives The findings of the study indicate that several policies and frameworks support e governance in Ghana but their implementations are burdened with social cultural political and legal constraints The study provides some recommendations that are necessary to tackle the challenges of e governance implementation Paper authored by Mr Ojo Patrick highlights battling sub Saharan African countries The perspective in this paper is that the emergence of democratic governments in this region occurred through lopsided process which impacts on their governance structures Consequently the institutionalization of liberal democracy has been omitted the absence of which creates gaps between aspiration for and struggle by African people for democracy on the one hand and the actual performance of democratic governments on the other hand The paper identifies structural deficiencies in the current pattern of governance as the political missing link in the value chain between democracy and development in the region The paper recommends e governance an administrative process that guarantees good governance through accountability and transparency as the necessary connecting link and panacea to bridging the observable existing gaps Paper authored by Dr Nandita Kaushal highlights the Plausibility of E Governance as a Public Service Delivery Mechanism in India It argues that there is no doubt wherever e governance projects have been conceived designed and implemented with due regard to the needs of the people there positive outcomes have been visible However it has to be acknowledged that most of the projects are facing multiple challenges which are reducing their success rate It

recommends serious consideration to all the issues which are hampering their efficiency At the same time it suggests measures that must be taken up to maintain the human face of these initiatives Paper authored by Dr Inderjeet Singh Sodhi reviews the achievements and progress of e government in India The paper briefly discusses various e government projects in India The purpose of the paper is to delve into policy and issue of the government of India in making e government accessible to the common person It briefly identifies the strategic issues for achievement of e government This paper derives a list of key strategic factors that are appropriate for planning designing development and implementation of e government The paper identifies the range of diverse problems challenges and barriers planners and developers must face as they work in the e government projects The paper discusses prospects and future of e government in India The paper highlights the role of government to develop richer and deeper understanding of e government Paper authored by Ms Shreyasi Ghosh attempts to trace the essence of e government in the modern era of Indian Public Administration today as another new paradigm shift is in the offspring and slowly becoming distinct from the amorphous shape of Public Administration in the Indian context with the ICT blessed governance or e Governance Paper authored by Ms Stuti Saxena probes the OGD platform using a qualitative and quantitative lens This paper shows that OGD usage is popular among the end users in terms of the number of views and downloads of the datasets Future research might undertake the empirical investigation of the research hypotheses advanced in the paper Paper authored by Dr Jyotirmoy W Singh is developed by a contributor who has been a national and International online examiner for past six or more years This paper is based on his experience It seeks to compare the traditional mode of examination with that of the online examination in citing the mode of High School Leaving Examination of Board of Secondary Education Manipur and International Baccalaureate Organisation IBO examination as case studies I wish scholars and potential readers will find this issue useful We will bring more special issues focused on e government and other various dimensions of governance in the near future Issue Editor Prof Manoj Dixit Professor and Head Department of Public Administration University of Lucknow Lucknow India
