Whipple,2012-12-06 On May 29 and 30 1985 a workshop was held to explore the legal ethical social scientific and practical aspects of the use of the de minimis risk concept for health and safety regulation The workshop was sponsored by the Society for Risk Analysis and its National Capital Area Chapter the Environmental Protection Agency the Nuclear Regulatory Commission and the Electric Power Research Institute The two day meeting was held in Washington D C at the Brookings Institution however the Brookings Institution was not a sponsor of the meeting and did not play a role in its program De minimis risk policy considerations were addressed from a theoretical and philosophical viewpoint from a quantitative and methodological basis and through insights gained with regulatory applications The distinctions between these three approaches to the subject are not sharp most papers in these proceedings address aspects of all three topics The reader familiar with the literature on the use of risk assessment in regulatory policy and decision making will find significant new contributions to the field One of these is the examination of regulatory actions in particular actions by the EPA in response to risks of varying magnitude Many attempts to seek patterns in regulatory policies have been based on analysis of the implicit economic value in obtaining risk reductions These analyses have typically found great variability in the marginal cost effectiveness of regulatory actions Differential Undercounts in the U.S. Census William P. O'Hare,2019-02-13 This open access book describes the differences in US census coverage also referred to as differential undercount by showing which groups have the highest net undercounts and which groups have the greatest undercount differentials and discusses why

such undercounts occur In addition to focusing on measuring census coverage for several demographic characteristics including age gender race Hispanic origin status and tenure it also considers several of the main hard to count populations such as immigrants the homeless the LBGT community children in foster care and the disabled However given the dearth of accurate undercount data for these groups they are covered less comprehensively than those demographic groups for which there is reliable undercount data from the Census Bureau This book is of interest to demographers statisticians survey methodologists and all those interested in census coverage
