Rechtsstaatsförderung Matthias Kötter, Tilmann Röder, Jens Deppe, Julie Trappe, Tillmann Schneider, 2022-03-23 Promoting constitutional law is an important sphere of action for German foreign and development policy. It is not a monopoly of the state, however, but is implemented by numerous organizations in Germany. The chances of a project succeeding and also plausible assumptions about its effects presuppose a knowledge of how to promote constitutional law that has so far not been systematically appreciated and processed either in German language research or in practice. This handbook fills that gap by comprehensively bringing together practical experience for the first time and linking it with the results of current legal and sociological research. The conceptual and theoretical foundations for promoting constitutional law are discussed as are various objectives and instruments. This is based on a broad concept of promoting constitutional law that includes interfaces with other policies such as human rights, promoting democracy, promoting good governance and security sector reform. The 70 authors combine many years of experience in practising the promotion of constitutional law, promotion and in legal and social science research.

Shaping Sustainable Change Leda Stott, 2018-09-03 Multi-actor partnerships are promoted as central to the achievement of sustainable development. However, these relationships are not always easy and calls are being made for more guidance on how partners can work together effectively to deliver results and achieve meaningful change. *Shaping Sustainable Change* explains the growing and significant role of partnership brokering in shaping these relationships. Drawing upon the work of the Partnership Brokers Association, it uses evidenced-based materials to show how the work of partnership brokering contributes to the management of collaborative relationships so that they are better positioned to have a positive and sustainable impact. As well as making the case for partnership brokering, the publication explores the profile and key activities carried out by partnership brokers and the skills required to undertake this role. Examples are also provided to illustrate how partnership brokering works in practice in relation to different contexts, sectors and themes. This book will appeal not only to partnership brokers but also to professional and academic readers interested in achieving sustainable development.
