**Handbook on Wealth and the Super-Rich** Iain Hay, Jonathan V Beaverstock, 2016-01-29 Fewer than 100 people own and control more wealth than 50 per cent of the world's population. The Handbook on Wealth and the Super Rich is a landmark multidisciplinary evaluation of both the lives and lifestyles of the super rich as well as the processes that underpin super wealth generation and its unequal distribution. Drawing on international case studies, leading experts from across the social sciences offer 22 accessible and coherently organized chapters which critically analyse a range of topics including the legitimacy of extreme wealth from a moral economic perspective, biographies of illicit super wealth, London's housing markets, how the very wealthy fly, the environmental consequences of super rich lives, crafting immigration policies to attract the rich. Students and scholars studying a host of topics such as development studies, economics, geography, history, political science and sociology will find this book eminently engaging. It will also be of great interest to public commentators, charitable organizations and NGOs concerned with wealth and income distributions.

**Why States Recover** Greg Mills, 2015-01-03 State failure takes many forms. Somalia offers one extreme. The country's prolonged civil war led to the collapse of central authority, with state control devolving to warlord-led factions that competed for the spoils of local commerce, political power and international aid. Malawi, on the other hand, is at the other end of the scale. During President Bingu's second term in office, the country's economy collapsed as a result of poor policies and Bingu's brand of personal politics. On the surface, Malawi's economy seemed largely stable, but underneath, however, the polity was fractured and the economy broken. In between these two extremes of state failure are all manner of examples, many of which Mills explores in the fascinating and profoundly personal *Why States Recover*. Throughout, he returns to his key questions: how do countries recover? What roles should both insiders and outsiders play to aid that process? Drawing on research in more than thirty countries and incorporating interviews with a dozen leaders, Mills examines state failure and identifies instances of recovery in Latin America, Asia and Africa. For anyone interested in the reasons behind states' failure and remedies to ensure future economic stability, it is important reading.

*Resilience and the Localisation of Trauma in Aceh, Indonesia* Catherine Smith, 2018 The globalisation of psychiatry has helped shape the way suffering and recovery is experienced in Aceh, Indonesia, a region with a long history of violent conflict. In this book, Catherine Smith examines the global reach of the contested yet compelling concept of trauma, which has expanded well beyond the bounds of therapeutic practice to become a powerful cultural idiom shaping the ways social actors understand the effects of violence and imagine possible responses to suffering. In Aceh, conflict survivors have incorporated the globalised concept of trauma into local languages, healing practices and political imaginaries. The incorporation of this globalised idiom of distress into the Acehnese medical moral landscape provides an ethnographic perspective on suffering and recovery and contributes to contemporary debates about the globalisation of psychiatry and its ongoing expansion outside the domain of medicine.
