Sustainable Career Development in the Turbulent, Boundaryless and Internet Age Shih-Chih Chen, Yongrok Choi, Athapol Ruangkanjanases, Yin Ma, 2024-07-22

With the impact of globalization and intensification of information technology, the ideas and practices of enterprise management are also changing rapidly nowadays. A practice that was incompletely unheard of yesterday may soon become a model for everyone to learn from tomorrow. The development of information technology has blurred the boundaries between work and non-work, and employees today have more options to work from home. At the same time, the family structure has also become more diversified with different types of income structures bringing many possibilities for work and family care models. In addition, the government's social policies such as school-to-work transitional regulations and the extended retirement age suggest that people today may face a quite different labor market situation compared to other generations. As individuals are facing longer and more complicated working life, it is very important to ensure their long-term employability by creating a healthy and successful career.

Vocational Psychological and Organisational Perspectives on Career, 2009-01-01. It has long been lamented that although several disciplines contribute to career scholarship, they work in isolation from one another, thus denying career theory, research, and practice the benefits that multidisciplinary collaboration would bring. This constitutes a lost opportunity at a time when new understandings and approaches are needed in order to respond effectively to global changes in society and work. This book takes a major step towards remedying this situation by bringing together two key perspectives on career: the vocational psychological and the organisational, interpreted broadly to include organisation behaviour and human resource management. Written by international experts, the book opens by identifying some of the tributaries that flow into the great delta of careers scholarship and noting the need to link what are at present separate islands of scholarship. It is structured to allow comparison between the ways in which the two perspectives address career development and career management theory, research, and interventions. It concludes by pointing to the possibilities for dialogue and even collaboration between these perspectives and suggesting ways in which these could be brought about. The book will be essential reading for career scholars because, with its potential to stimulate new thinking and developments in theory and research and also importantly in practice with beneficial spin-offs for policy makers, this dialogue

could open a new phase in career scholarship With its overviews of the history theory research and practice of both perspectives the book will also be a valuable resource for students of both perspectives **Journal of Career Development** ,2005 *The Career Development Quarterly* ,2009 **Facilitating the Career Development of Students in Transition** Paul A.
