Orozco,2019-08-29 Companies are continually looking for people with the ability to work as a team It is normal since your own survival depends on that ability But you know well that in practice most teams are not such The bosses never admit their mistakes Neither do team members And if someone does it the boss and co workers beat them up So everyone thinks better to stay silent Nobody presents new ideas or participates in decisions And no one commits to the objectives and results There is no team but a jungle an every man for himself When trust is destroyed everything goes to hell Many companies and projects fail Many professional expectations are frustrated Talent and money are wasted problems such as anxiety and burnout even appear But is it possible to create and maintain a climate of trust between people who work together The answer is yes it is possible to work with people who are accomplices not mere colleagues or subordinates It is possible to work in a team in which you grow personally and professionally with other people You grow thanks to others and others grow thanks to you When this is achieved toxic people mediocrity and routine disappear Motivation and results come naturally How is this climate of trust and collaboration achieved To answer this question I have written Scrum for Non Techies It is a book to learn how to form high performance and highly creative teams based on trust complicity and collaboration This way of working as a team is called Scrum It started in the 90s and is the most used in the world of computer programming The most leading multinationals use it Google Amazon Facebook BBVA Compass Bank Lockheed Martin Microsoft etc But Scrum has spread to environments that have nothing to do with the development of computer programs schools town halls renovation companies strategic development plans and other very diverse areas In all of them Scrum has amply demonstrated its ability to generate high performance and highly creative teams based on trust complicity and collaboration The book will help you understand why Scrum works so well It is based on the evidence that trust and complicity are born from participation That s why all team meetings are tremendously participatory Scrum for Non Techies will also give you the tools to apply this way of working in any type of project You will learn how not to waste time on things that do not add value You will learn to maintain sustainable work rates to avoid burning out the team and to maintain creativity and reduce errors You will learn how the team can learn from mistakes and apply continuous improvement as a common practice You will learn what leadership really is And much more I know very well what I m talking about as I have extensive professional experience in the application of Scrum and in team coaching I met it in 2006 and I have specialized in it working as an employee and as an independent consultant Additionally in 2014 I was certified as a Scrum Manager and in 2015 as an Agile practitioner by the prestigious Project Management Institute In 2020 I obtained the Master Coaching Mentoring Fundamentals for Agile from the Escuela Europea de Coaching in Spain The time has come to leave behind the teams in which your opinion and judgment do not count The time has come to work in high performance and highly creative teams based on trust complicity and collaboration You are one step away from achieving it *Professional Scrum Development with Microsoft Visual Studio*

The Data Dialogues Martyn Richard Jones, 2025-07-25 The world of data information and knowledge is not merely technical It is cultural Philosophical Even spiritual at times It offers the promise of precision in an age of confusion a kind of sacred geometry hiding within spreadsheets APIs and machine learning models At its best this world stretches the human mind challenging how we define truth how we negotiate complexity and how we reconcile seemingly irreconcilable contradictions It is the domain of paradox and possibility But if that sounds a little too poetic for a tech column it s because the real story of data today is more conflicted and more compromised Beneath the surface of the data revolution where we are supposedly unlocking insight at scale and democratising analytics lies a darker current One of opportunism one of illusion The world of data is not just full of brilliant engineers and thoughtful epistemologists it s also teeming with chancers charlatans and con artists A rogues gallery of pitch deck hustlers and clickbait futurists A carnival of snake oil salesmen dressed in TED Talk casual hawking AI powered this and cloud native that with all the depth of a bumper sticker We are in the middle of a data gold rush and like every gold rush in history it has attracted not just pioneers but profiteers

The Windsor Magazine ,1920 **Light** ,1917 **Fighters in the Blood** Black' Robertson,2020-08-31 A retired RAF air marshal looks back on his career and the career of his World War II pilot father in this military memoir As this fascinating memoir unfolds moving backwards and forwards through time two parallel stories emerge one of a Second World War Spitfire ace whose flying career comes to a premature end when he is shot down and loses an eye the other of his progeny a second generation fighter pilot who eventually reaches the rank of air marshal The narrative is unique in its use of two separate and distinct voices The author's own reminiscences are interwoven with those his father recorded more than thirty years ago embellished by extracts from some 300 of his wartime letters Intensely personal and revealing controversial too at times this account is above all about people not least those with whom the author flew while serving with the USAF a tour marked by tragedy that said they proved altogether more friendly than the P 38 pilots who twice attacked his father in North Africa A daughter with dual citizenship subsequently helped him sustain his links with the US both while serving and afterwards in business The irony is that the son spent a lifetime training for the ultimate examination one that despite strictly limited preparation his father passed with flying colors To Black Robertson's eternal regret he was never able to put his own training to the test His father Robbie was awarded the DFC and retired as a flight lieutenant after five years or so He himself served for nearly thirty six years earned a Queen's Commendation an OBE and CBE and served as an ADC to HM The Queen But after reaching almost the top of the RAF tree in one important sense he retired unfulfilled his mettle was never tested under fire Anyone interested to know more about flying about the RAF about leadership about character even need look no further than this beautifully crafted immensely readable account Praise for *Fighters in the Blood* Offers an insightful look into the professional development of an RAF airman from Cranwell cadet to Air Marshal the evolution of the Royal Air Force itself from the early jet era of Hunters through the demanding days of NATO versus the Warsaw Pact and the defence of British interests e.g the Falklands with the Phantom and then on into the post Cold War world where the need to strengthen RAF airpower is challenged by drawdowns budgetary stringencies and often misguided Mandarins driving questionable defence policy I was struck by how beautifully the author integrated his father into the story it is at once very moving and very effective and once again works to integrate the RAF then with the RAF of the 1960s 1990s The photographs are wonderful
