Secret Life Of Plants Documentary:

The Secret Life of Plants Peter Tompkins, 1989-03-08 The world of plants and its relation to mankind as revealed by the latest scientific discoveries Plenty of hard facts and astounding scientific and practical lore Newsweek [Vegetal Sex](#) Stella Sandford, 2022-10-06 This book introduces the reader to the exciting new field of plant philosophy and takes it in a new direction to ask what does it mean to say that plants are sexed Do male and female really mean the same when applied to humans trees fungi and algae Are the zoological categories of sex really adequate for understanding the uniquely dibiontic life cycle of plants Vegetal Sex addresses these questions through a detailed analysis of major moments in the history of plant sex from Aristotle to the modern day Tracing the transformations in the analogy between animals and plants that characterize this history it shows how the analogy still functions in contemporary botany and asks what would a non zoocentric plant centred philosophy of vegetal sex be like By showing how philosophy and botany have been and still are inextricably entwined Vegetal Sex allows us to think vegetal being and perhaps to recognize the vegetal in us all

Household Horror Marc Olivier, 2020-02-11 A scholar examines 14 everyday objects featured in horror films and how they manifest their power and speak to society's fears Take a tour of the house where a microwave killed a gremlin a typewriter made Jack a dull boy a sewing machine fashioned Carrie's prom dress and houseplants might kill you while you sleep In Household Horror Marc Olivier highlights the wonder fear and terrifying dimension of objects in horror cinema Inspired by object oriented ontology and the nonhuman turn in philosophy Olivier places objects in film on par with humans arguing for example that a sleeper sofa is as much the star of Sisters as Margot Kidder that The Exorcist is about a possessed bed and that Rosemary's Baby is a conflict between herbal shakes and prenatal vitamins Household Horror reinvigorates horror film criticism by investigating the unfathomable being of objects as seemingly benign as remotes radiators refrigerators and dining tables Olivier questions what Hitchcock's Psycho tells us about shower curtains What can we learn from Freddie Krueger's greatest accomplice the mattress Room by room Olivier considers the dark side of fourteen household objects to demonstrate how the objects in these films manifest their own power and connect with specific cultural fears and concerns Provides a lively and highly original contribution to horror studies As a work on cinema it introduces the reader to films that may be less well known to casual fans and scholars more conspicuously it returns to horror staples gleefully reanimating works that one might otherwise assume had been critically done to death Psycho The Exorcist The Shining Allan Cameron University of Auckland **Botanical Imagination** Jon L. Pitt, 2025-04-15 Botanical Imagination explores the complicated legacy and enduring lure of plant life in modern Japanese literature and media Using critical plant studies Jon L Pitt examines an unlikely group of writers and filmmakers in modern Japan finding in their works a desire to become botanical in both content and form For nearly one hundred years a botanical imagination grew in response to moments of crisis in Japan's modern history Pitt shows how artists were inspired to seek out botanical knowledge in order to

construct new forms of subjectivity and attempt to resist certain forms of state violence As he follows plants through the tangled histories of imperialism and state control Pitt also uncovers the ways plants were used in the same violence that drove artists to turn to the botanical as a model of resistance in the first place Botanical Imagination calls on us to rethink plants as significant but ambivalent actors and to turn to the botanical realm as a site of potentiality **A New History of**

This volume features new research about the philosophy of plant intelligence and plant cognition one of the most intriguing and complex current debates at the intersection of biology cognitive science and philosophy The debate about plant cognition is marked by deep disagreements Some theorists are confident that the empirical evidence supports the ascription of

cognitive capacities to plants Others hold that such claims are overblown and defend more traditional non cognitive accounts of plant behavior Still others seek to formulate intermediate positions This volume brings together leading researchers from across this theoretical spectrum to tackle the foundational questions that are at issue in the debate about plant cognition The contributions focus on the philosophical questions raised by recent discoveries and controversies in the empirical sciences such as Can plants be said to have genuine cognitive abilities Can they be characterized as representing or perceiving their environment as pursuing goals or even as having some form of conscious experience Which data could provide evidence for such characterizations And what are possible implications of these issues for general questions about the nature of cognition representation perception and consciousness Philosophy of Plant Cognition will be of interest to scholars and students working in philosophy of mind philosophy of biology cognitive science and plant biology **Sounding Like a No-No**
