Chapter 12.1 – The Fossil Record

MAIN IDEA: Fossils can form in several ways. In the spaces provided, write either the type of fossil being described or a brief description of how the fossil type is formed.

| Type of Fossil           | Description of Fossil Formation                                                                                        |
|--------------------------|------------------------------------------------------------------------------------------------------------------------|
| 1.                       | Organism trapped in tree resin that hardens after being buried.                                                        |
| 2. <b>Natural cast</b>   | An impression is left in sediment, and minerals fill the impression in, recreating the original shape of the organism. |
| 3. Trace fossil          |                                                                                                                        |
| 4. Permineralized fossil | <b>Minerals are deposited around a hard structure and may replace the structure</b>                                    |
| 5.                       | Organism becomes encased in materials such as ice or volcanic ash, or immersed in a bog.                               |

Use Figure 12.2 in the textbook to fill in a sequence diagram that describes the process of permineralization.

Fill-in the graphic organizer with the appropriate terms, definition and examples (examine pages 360-363 in the textbook to assist you):
