Halal and Kosher Food Osman Ahmed Osman, Abdel Moneim Elhadi Sulieman, 2023-10-12. In both Islamic and non-Islamic countries many population groups worldwide such as vegetarians and people of the Jewish faith consumers do not eat pork. Amongst these groups consumers are concerned about importing processed food which may contain or has been contaminated with pork or swine derived products. This is especially true of halal foods in Muslim communities where the foods may be prepared or processed utilizing one of more non halal ingredients. Halal and kosher foodstuff play an incredibly important role in the Muslim and Jewish diet economy and health. This makes halal and kosher food product quality safety and shelf life preservation a major topic in these communities and for the manufacturers of halal and kosher food products. Halal and Kosher Food Integration of Quality and Safety for Global Market Trends covers a wide range of important topics in halal foods including quality standards safety of food additives antimicrobial and veterinary drug residues aflatoxin in feedstuff application of Hazards Analysis and critical Control Points HACCP. Important data regarding halal and kosher food similarities and differences are covered in full. Best practices in halal food product manufacturing are covered plus the importance of halal food safety for consumer health. Written by elite international halal food experts this work differs from other books on the subject which focus on history legislation and certification. Readers can utilize this book as an orientation and practical guidebook to recognize the quality and safety of halal food products.

Concise Encyclopedia of Science and Technology of Wine V. K. Joshi, 2021-07-21. When asking the question what is wine there are various ways to answer. Wine is extolled as a food a social lubricant an antimicrobial and antioxidant and a product of immense economic significance. But there is more to it than that. When did humans first start producing wine and what are its different varieties? Are wines nutritious or have any therapeutic values? Do they have any role in health or are they simply intoxicating beverages? How are their qualities determined or marketed and how are these associated with tourism? Concise Encyclopedia of Science and Technology of Wine attempts to answer all these questions and more. This book reveals state of the art technology of winemaking describing various wine regions of the world and different cultivars used in winemaking. It examines microbiology biochemistry and engineering in the context of wine production. The sensory qualities of wine and brandy are explored and the composition nutritive and therapeutic values and toxicity are summarized. Selected references at the end of each chapter provide ample opportunity for additional study. Key Features: Elaborates on the recent trends of control and modeling of wine and the techniques used in the production of different wines and brandies. Focuses on the application of biotechnology especially genetic engineering of yeast bioreactor technological concepts enzymology microbiology killer yeast stuck and sluggish fermentation etc. Illustrates the biochemical basis of wine production including malolactic fermentation.

Examines marketing tourism and the present status of the wine industry Concise Encyclopedia of Science and Technology of Wine contains the most comprehensive yet still succinct collection of information on the science and technology of winemaking With 45 chapters contributed by leading experts in their fields it is an indispensable treatise offering extensive details of the processes of winemaking The book is an incomparable resource for oenologists food scientists biotechnologists postharvest technologists biochemists fermentation technologists nutritionists chemical engineers microbiologists toxicologists organic chemists and the undergraduate and postgraduate students of these disciplines

Evaluation of Quality of Fruits and Vegetables Harold E. Pattee, 2014-11-14 Acceptance or rejection of any edible commodity whether it is raw or processed is usually conditioned by sensory stimuli The impact of these stimuli on the decision making process is broadly termed sensory evaluation Advances in sensory evaluation research have been slow in the past because of the human factor the necessity to use highly trained sensory panels to conduct this research High technology in instrumentation and new understandings of sensory evaluations are now combining to make possible quantum jumps forward in sensory evaluation research It is widely recognized that the sensory aspects of fruits and vegetables are affected by many factors among them environment variety cultural practices and handling practices However if one attempts to find a general reference or compilation of findings regarding this subject area there seems to be few if any available A survey of the literature does suggest that in the past few years research into specific factors which influence the sensory aspects of fruits and vegetables has increased significantly This increased interest in sensory research and the renewed national awareness of the value of research into pre and postharvest quality of fruits and vegetables prompted the Flavor Subdivision Agricultural and Food Chemistry Division American Chemical Society to sponsor a symposium entitled Sensory Evaluation of Fruits and Vegetables Effect of Environment Cultural Practices and Variety during the 1982 meeting in Kansas City Missouri
