Japan, Moving Toward a More Advanced Knowledge Economy, 2 Tsutomu Shibata,Hiroataka Takeuchi,2006-01-01 These two volumes analyze Japan from the Knowledge Economy perspective covering a wide range of sectoral issues in development including the macro economic framework education and skills training the national innovation system science and technology information and communication technology and infrastructure While Volume 1 explores the four pillar of the Knowledge for Development framework the second volume presents up to date case studies of outstanding Japanese private companies that each characterize different aspects of the Knowledge Economy By combining economics and business these volumes allow readers to grasp the full scope of today s knowledge economy **Business Models and Firm**

Internationalisation Christian Nielsen,Svetla T. Marinova,Marin A. Marinov,2021-12-21 Internationalisation has been a binding request for firms dealing with the challenges of the present day realities Extant international business publications have recently begun to point out the relationship between the notions of business model and internationalisation yet the field needs considerably more attention The core aim of this book is to provide a comprehensive analysis of the ways in which business models and internationalisation impact one another in the process of initiating and expanding international business activities The analysis makes it feasible to detect the core issues of the interdependences between business models and internationalisation to facilitate management decision making and implementation of pertinent firm internationalisation incorporating the application of appropriate business models In this book the business model is applied to explore the specifics and aspects of firm internationalisation processes Innovating the business model is analysed as a persuasive means for augmenting the propensities of firms to internationalise The book enriches the comprehension of the significance of business model innovation as an enabler of firm internationalisation in view that it shows in what manners business model innovation facilitate firm internationalisation The book chapters address a broad range of issues encompassing the general roles of business model in firm internationalisation the relationships between digital business models and platforms on one side and firm internationalisation on another how business models determine the internationalisation of services firms the interplay between business models and firm internationalisation in specific contexts It will therefore be of interest to researchers academics and advanced students in the fields of international business and management *Seven-Eleven Japan Co* Sunil Chopra,2003 The goal of this case is to illustrate how a firm can be successful by structuring its supply chain

to support its supply chain strategy Once Seven Eleven Japan decided to provide responsiveness by rapid replenishment it then structured its facilities inventory information and distribution to support this choice The case also brings up the question of whether the same approach can work in the United States especially given the greater distances and lower store density

The Wise Company Ikujiro Nonaka,Hirotaka Takeuchi,2019-09-13 High velocity change is the fundamental challenge facing companies today Few companies however are prepared to continuously innovate because they focus on the short term and do not emphasize the wisdom needed to make sure that their interests are aligned with those of society Practical wisdom is the bases of continuous innovation where companies ceaselessly and repeatedly creating new knowledge disseminating it throughout the organization and converting knowledge to action over time In The Wise Company legendary management experts Ikujiro Nonaka and Hirotaka Takeuchi highlight how various companies have confronted the challenge of rapid change to create new products and new ways of doing business that benefit employees consumers and society The key a relentless self renewal process where companies realize the future they envisions rather than only responding to changes in the environment Nonaka and Takeuchi argue that while knowledge creating companies focusing on tacit and explicit knowledge can generate innovation they cannot create it on a continuous and ongoing basis without having wisdom about human interactions and how they influence organizational structures and practices Companies that have resilience longevity and sustainability share a number of characteristics Nonaka and Takeuchi show Strategies are based on alignment of organizational and societal benefits Leaders grasp the core of any situation or problem quickly and intuitively comprehend the nature and meaning of people things and events But wise leadership is not enough wisdom must infuse the organization through informal as well as formal shared interactions and communications that focus on metaphors and stories that convey the essence and meaning of strategies and actions In short Nonaka and Takeuchi demonstrate how continuous innovation results from companies ceaselessly and repeatedly creating new knowledge disseminating knowledge throughout the organization and converting that knowledge to action The Wise Company presents a new model of knowledge creation and practice for the twenty first century
