AI Tools and Applications for Women's Safety Ponnusamy, Sivaram,Bora, Vibha, Daigavane, Prema M., Wazalwar, Sampada S., 2024-01-24 In an era marked by rapid technological progress women's safety remains a pressing concern despite strides toward gender equality Women continue to grapple with safety challenges in both public and private spaces enduring harassment violence and discrimination driven by entrenched societal norms and modern complexities Amidst these challenges harnessing the potential of artificial intelligence AI emerges as a promising avenue to reshape the landscape of women's safety The groundbreaking book AI Tools and Applications for Women's Safety curated by experts Sivaram Ponnusamy Vibha Bora Prema Daigavane and Sampada Wazalwar delves into the transformative power of AI to address the daily safety concerns women face This timely volume explores innovative AI driven resources and applications that redefine personal security offering tailored protection through real time threat assessment and emergency response coordination With comprehensive insights spanning academia law enforcement policymaking and advocacy this book covers predictive safety analytics smart surveillance ethical considerations and more AI Tools and Applications for Women's Safety not only sheds light on the promise of AI but also paves the way for informed discourse and meaningful action ushering in a future defined by women's empowerment and security

Wearable Devices, Surveillance Systems, and AI for Women's Wellbeing Ponnusamy, Sivaram,Bora, Vibha, Daigavane, Prema M., Wazalwar, Sampada S., 2024-03-25 In a world where the safety of women remains a pressing issue the intersection of artificial intelligence AI and emerging technologies is a motivating force Despite strides toward gender equality women continue to face threats harassment and violence necessitating innovative solutions Traditional approaches fall short of providing comprehensive protection prompting the exploration of innovative technologies to address these challenges effectively Wearable Devices Surveillance Systems and AI

for Women's Wellbeing emerges as a timely and indispensable solution to the persistent safety issues faced by women globally. This persuasive book not only articulates the problems women encounter but also presents groundbreaking solutions that harness the transformative potential of AI. It delves into the intricate ways AI applications from mobile safety apps to predictive analytics can be strategically employed to create a safer and more inclusive society for women. **Supply Chain**

Performance Measurement in Textile Enterprises Pranav C. Charkha, Santosh B. Jaju, Prasenjit Chatterjee, 2024-06-28
This new volume provides detailed insight into supply chain management (SCM) and supply chain performance measurement (SCPM) in the textile industry. The book provides a comprehensive set of performance sub-criteria for the evaluation of SCPM, offering the information needed to understand, implement, and evaluate the supply chain performance of the textile industry and its cyclic processes. Using the Delphi method, a process used to arrive at a group opinion or decision by surveying a panel of experts, the authors studied several companies of diverse sizes and applied an analytical hierarchy process to establish crucial performance measurement criteria and sub-criteria. Around 80 textile industry personnel were contacted, including general managers, factory managers, managers, assistant managers, executives, and supervisors involved in various functions related to textile supply chains, to discuss procurement, production, and distribution alternatives. The authors employed the multi-criteria decision-making technique, i.e., analytical hierarchy process, for executing pairwise comparison and establishing priority weights of criteria, sub-criteria, and for estimating the contribution of supply chain cyclic processes to overall supply chain performance. **NEERI Annual Report** National Environmental Engineering Research Institute, 2009

AI-Driven Innovations in the Insurance Sector B.R., Manjunath, Sahrawat, Munish, Kaul, B.K., 2025-10-10
Artificial intelligence (AI) revolutionizes the insurance sector, driving innovations that reshape how insurers assess risks, process claims, detect fraud, and communicate with customers. From advanced data analytics and machine learning algorithms to chatbots and predictive modeling, AI technologies enhance operational efficiency and enable more personalized, proactive services. As insurers leverage these tools to gain competitive advantages and streamline decision-making, they navigate challenges related to data privacy and regulatory compliance. This shift reveals a new era in insurance where digital intelligence plays a role in strategy and service delivery. **AI-Driven Innovations in the Insurance Sector** delves into the transformative role of AI in reshaping the insurance industry. It examines how these innovations enhance operational workflows, improve risk assessment, streamline claims processing, and elevate customer experiences. This book covers topics such as human resources, chatbots, and risk management and is a useful resource for business owners, computer engineers, academicians, researchers, and data scientists.
