achievements that reflect our humanity power our economy and constitute fundamental aspects of our lives as citizens consumers parents and members of the workforce Providing all students with access to quality education in the STEM disciplines is important to our nation s competitiveness However it is challenging to identify the most successful schools and approaches in the STEM disciplines because success is defined in many ways and can occur in many different types of schools and settings In addition it is difficult to determine whether the success of a school s students is caused by actions the school takes or simply related to the population of students in the school Successful K 12 STEM Education defines a framework for understanding success in K 12 STEM education The book focuses its analysis on the science and mathematics parts of STEM and outlines criteria for identifying effective STEM schools and programs Because a school s success should be defined by and measured relative to its goals the book identifies three important goals that share certain elements including learning STEM content and practices developing positive dispositions toward STEM and preparing students to be lifelong learners A successful STEM program would increase the number of students who ultimately pursue advanced degrees and careers in STEM fields enhance the STEM capable workforce and boost STEM literacy for all students It is also critical to broaden the participation of women and minorities in STEM fields Successful K 12 STEM Education examines the vast landscape of K 12 STEM education by considering different school models highlighting research on effective STEM education practices and identifying some conditions that promote and limit school and student level success in STEM The book also looks at where further work is needed to develop appropriate data sources The book will serve as a guide to policy makers decision makers at the school and district levels local state and federal government agencies curriculum developers educators and parent and education advocacy groups
