God-Given or Bust Cheryl K. Chumley,2025-01-14 In America either rights come from God or they don t This is the ultimate war and God Given or Bust tells how patriots can win American exceptionalism is rooted in the idea that individual rights come from God and government is only in place to preserve and protect those rights But America s losing sight of that

concept America's turning into a country where the government grants rights and privileges to only those the government deems worthy and takes them from those it deems unworthy This is not how the Founding Fathers envisioned the nation this is not how the concept of inalienable rights coming from a Creator works Rather this is how Marxism communism and collectivism spread If we want a nation that's free for generations to come then we must reclaim the notion of God given and ditch the idea of government granted The only way to do that is for Americans of faith to rise up and inject biblical values and godly principles into government culture and society and put God once again at the center It's time to demand the God given or the great American experiment will come to an end

The Artifice of Intelligence Noreen Herzfeld, 2023-02-28 AI is becoming ubiquitous Whatever its arrival portends for our future whether riches or ruin it cannot be avoided The Artifice of Intelligence explores two questions at the heart of a theological response to AI Is it possible for human beings to have authentic relationships with an AI How does the increasing presence of AI change the way humans relate to one another In pursuing answers to these questions Herzfeld explores what it means to be created in the image of God and to create AI in our own image It utilizes and expands Karl Barth's relational understanding of the imago Dei to examine humanity's relationship both with AI and through it with one another Barth's injunctions look the other in the eye embodiment speak to and hear the other communication aid the other agency and do it gladly emotion provide the basis for the main chapters each of which concludes with a case study of a current AI application that exemplifies the difficulties AI introduces into human relationality The Artifice of Intelligence concludes with an examination of the incarnation one that points toward the centrality of embodiment for full relationality
