**Mental Math** Abhishek VR, 2019-05-19 Discover the Mental Math Secrets to Become a Human Calculator Schools taught you a way to do math that works when you have a pen paper But the same methods takes a lot of effort when you have to do math in your head This is because it uses a lot of your working memory the short term memory used to complete a mental task For example try to mentally multiply  $73\,201 \times 3$  It might take only a few seconds to multiply the individual digits But if you multiply right to left the way you learnt in school you

will rely on your working memory You will use it to recall every single digit you calculate to put it back together and get your final answer You may even find yourself calculating some digits again because you forgot one of the numbers The difficulty increases further when you have to multiply larger numbers like  $732 \times 323$  You will have to remember numbers across many steps Mental arithmetic would be a lot easier to do in your head if you didn't have to remember so many numbers In school you learnt to write the down numbers as you calculate to free up your working memory In mental math there are many other ways to do the same thing One of the tricks to free up your working memory is to calculate from left to right instead of right to left Try multiplying  $73\ 201 \times 3$  from left to right starting from  $7 \times 3$  and ending with  $1 \times 3$  You will find yourself calling out the answer before you even finish the whole problem You can use this trick to solve any math problem in the future But we have just scratched the surface There are many more tricks inside the book that make doing mental math as easy as reading a comic Here is a glimpse of what you will be able to master Mentally add large numbers Example Add  $8739\ 5492$  in your head in seconds Subtract numbers fast Example Mentally subtract  $7520\ 4998$  without writing anything down Multiplication tricks to multiply three digit numbers Example Multiply  $323 \times 123$  in your head Square large numbers in seconds Example Calculate  $64 \times 64$  faster than a calculator Mentally divide large numbers Example Divide  $601324$  by  $73$  entirely in your head Quickly check a calculation with 90% accuracy without re calculating Overcome math anxiety Cement your mental math skills with bonus weekly training This book only has the best techniques used by over 27 mental and Vedic math experts across the world The techniques in this book are so simple you will wonder why nobody taught you this before You will be able to master it even if you have failed math in school Imagine waking up tomorrow being able to do lightning fast math in your head Your family friends will look at you like you are some kind of a genius Since you do the calculations in your head you will acquire better mental habits in the process So you will not just look like a genius You will actually be one Buy Now To Become A Human Calculator Every minute you wait to buy this book is another minute you don't see the benefit of being good with math numbers Put the power of mental math to work in your life so you can quickly easily make math and numbers more useful develop better memory habits increase concentration develop new ways to think and do speed math entirely in your head faster than a calculator Get your copy today A MUST BUY for students of Vedic Mathematics GMAT GRE SAT Case Study Interview and Case Interview

**50 Amazing Math Tricks** Rajdeep Ghai,2012-12-05

50 Amazing Math Tricks is a fantastic tool to bring alive the magic of Math It explains fascinating and smart methods of doing mental calculations Organized as a workbook it has 50 chapters with each chapter consisting of explanations solved examples followed by several problems to practice your learning immediately It is a practical and fun book and helps you get much better at arithmetic calculations You learn methods that will make you think differently about numbers It will allow you to do calculations in your head quicker smarter and more accurately This book will help you get smarter and better at Mental Arithmetic But what is the benefit of that Why should you get better at Mental Math 1 It helps you become numerically literate a skill in short supply and always more in demand Ability to calculate mentally helps in developing an understanding of numbers 2 You get confidence in handling numbers in all day to day situations without relying on devices like calculators 3 You learn new skills and exercise your brain the most important muscle of your body that is probably getting rusted from lack of use 4 It will help increase your calculation speed by 5 to 10 times Galileo said The universe is written in the language of mathematics Let this be the first step towards understanding the alphabet of that language Math is simple Calculating is a natural function of our brain It can be fun Start connecting with numbers and make numbers your friend Speed Math

Gaurav Tekriwal,2014-01-07 Do math more quickly and with more confidence with less reliance on paper apps and calculators For people who automatically run to the nearest calculator Idiot s Guides Speed Math teaches tips tricks and straightforward methods to doing math at a fast and accurate rate Practice examples easily illustrate how even the most math shy person can better perform calculations *Secrets of Mental Math - Master The Art* Kenneth Paek,2015-01-22

Mathematics is not a new subject to us because almost everyone knows how to count either with fingers or pen and paper in whichever language we are comfortable with Math is not only the game of numbers but also the language of nature As a matter of fact it has been established through research that the more we understand our universe the more we discover

interesting mathematical connections For instance flowers have spirals that are carefully lines up in a special sequence of numbers commonly referred to as Fibonacci numbers This sequence can be studied understood and generated A study on seashells also revealed that they form perfect mathematical curves known as logarithmic spirals that originate from a chemical balance Apart from the flowers and seashells star clusters also form a mathematical arrangement in the way they tag on one another This has been observed through astronomical studies Scientists including mathematicians have spent centuries trying to discover the nature of math and how to develop a mastery of the same It is possible to get comfortable with calculations of any nature as long as you discover the secrets behind the numerics The reason why it is important to unravel and enhance your command of math is because numbers are part and parcel of our daily lives even in ways that at times we don t notice For example if you need to call someone you need a phone number The time you spend on your phone conversation is measured in hours and minutes which are also numbers Think of any date in history including your birthday graduation day or just any other significant day and you will find that recording it in numbers is much easier than in any other form This book will show you the tricks and shortcuts that will make math so intriguing You will definitely impress your friends and colleagues with your lightning fast calculating ability But most importantly these secrets will benefit you at a personal level because you will be able to handle complex numeric problems within seconds
