

Ocean Surface Circulation

6. Two students are discussing the surface currents in the Pacific Ocean in the northern hemisphere.

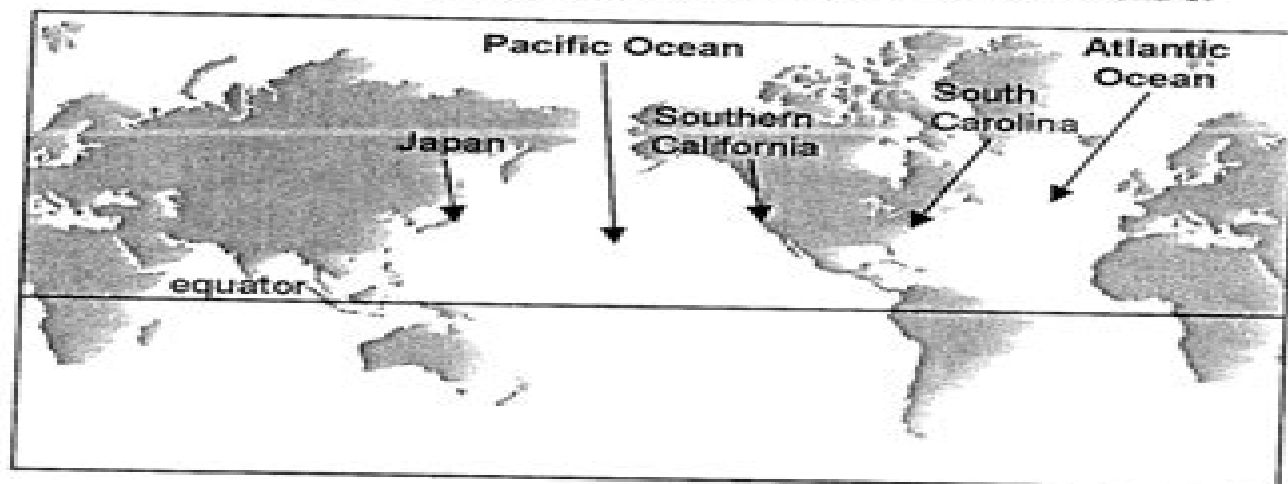

Student 1: *I think the surface current travels clockwise, like I drew to the right, because the wind is the same as over the Atlantic Ocean in the northern hemisphere. The cold-water current is moving south next to the West Coast of North America.*

Student 2: *I think it travels counterclockwise, like I drew. The Atlantic Ocean is a different ocean than the Pacific Ocean, so the currents will travel in different directions. The warm-water current is moving north next to the West Coast of North America.*

With which student do you agree? Why?

7. Ocean water at beaches in Southern California on the West Coast are much colder than beaches in South Carolina on the East Coast, even though they are located at the same latitude. Explain why, using the direction of the surface currents near each coast.
8. On the world map, draw in the large surface ocean circulation in the northern hemisphere for the Pacific and Atlantic Oceans. Check your answers with Questions 2 and 6.
