

Chapter 9-2 Genetic Crosses

Genotype and Phenotype

- An organism's genetic makeup is its genotype
- The genotype consists of the alleles that the organism inherits
 - The genotype is represented by Pp or PP
- An organism's physical appearance is its phenotype
 - The phenotype of a Pp or PP plant is purple flowers
- When both alleles of a pair are alike the organism is said to be homozygous (PP or pp)
- When both alleles of a pair are different the organism is said to be heterozygous (Pp)

Probability

- The likelihood that a specific even will occur
- Can be expressed in percentages, fractions, or ratios
- The results are more likely to occur when there are many trials

Monohybrid Crosses

- A cross between organisms in which only one characteristic is being tracked
- Punnett square is used to predict the probability of inherited traits
- Example 1: Homozygous x Homozygous
 - Cross between two true-breeding organisms (PP x pp)
 - All organisms have Pp genotype and exhibit the dominant allele
- Example 2: Homozygous x Heterozygous
 - Cross between PP and Pp
 - 50% probability of Pp offspring; 50% probability of PP offspring (this is with EACH gamete produced)
 - all offspring will exhibit the dominant allele
- Example 3: Heterozygous x Heterozygous
 - Cross between Pp and Pp
 - 25% probability of PP; 50% probability Pp; 25% probability pp
 - 75% of the offspring will exhibit the dominant allele; 25% will exhibit the recessive allele
- Example 4: Testcross
 - If you are unsure of an individuals genotype, you could perform a testcross with an individual of homozygous recessive genotype
 - If a recessive allele is expressed in any of the offspring, you would be able to identify that the unknown genotype would be heterozygous

Incomplete Dominance

- Occurs when the phenotype of a heterozygote is an intermediate between the phenotypes of the parents
- Ex: red flowers crossed with white flowers produce pink flowers

GENERAL BIOLOGY Investigating Life is an introductory level college biology textbook that provides students with an accessible and engaging look at the fundamentals of biology. Written for a two term undergraduate course of mixed majors and non majors this reader friendly text is concept driven vs terminology driven. That is the text is based on the underlying concepts and principles of biology rather than strict memorization of terminology. Written in a student centered conversational style this educational research based textbook uniquely connects students and our society to living things from various perspectives economic ecologic medical and cultural exploring how the biological world and human realm are intimately intertwined. End of chapter questions challenge students to think critically and creatively while incorporating science process skills and biological principles.

Biology Cecie Starr, 1994 This streamlined book distills biology's key concepts and connects them to the lives of students with numerous timely applications including compelling new vignettes at the beginning of each chapter. Once again Starr created new remarkably clear illustrations to help explain complex biological concepts. As with every new edition she continues to simplify and enliven the writing without sacrificing accuracy. The author has done a major revision of each chapter so that there is extensive updating and organizational changes to enhance the text's flow. As the following features indicate the major thrust of the new edition is to enhance accessibility and further stimulate student interest.

Biology Vernon L. Avila, 1995 This exciting edition of Avila's popular biology textbook offers current accurate clearly written and well organized information including seven new chapters. Written for introductory biology courses this text represents the philosophy that an understanding of the principles of biology from a cellular perspective is key to a biological literacy and a full appreciation of the many intricacies of life.

Agricultural Biotechnology Vidya Venkataram, Kathleen Hefferon, 2023-04-19 Agricultural biotechnology and the production of GM crops have been controversial despite being practiced in both developed and developing countries the major reason being their potential negative impact on human animal health or environment. Also prevalent is the view that it is simply unethical to engineer different forms of life in the laboratory especially when it comes to consuming food generated through genetic engineering.

GM crops have been introduced into the agricultural landscape more than 2 decades ago which has allowed us to study their effects on economy health and the environment Agricultural Biotechnology Genetic Engineering for a Food Cause is a compendium of information practices observations and discernible insights on agriculture biotechnology and sustainable development The book begins by descriptions of genetic engineering practices and strategies for producing GM crops their importance in the food chain and advantages of GM crops over non modified crops Followed by chapters on the strategic genetic applications and the use of synthetics microbiology and microbial symbiosis Agricultural Biotechnology Genetic Engineering concludes with an insight of the Future of microbiotechnology in agricultural practices Agricultural Biotechnology Genetic Engineering for a Food Cause fills a gap by summarizing the available literature in a wide variety of topics under one single volume being accessible to audiences in academic government and industry spaces Provides knowledge of the purposes of engineering microbes Includes the latest techniques and practices in microbiology Gives an insight in the future of agricultural microbiotechnology
