county to correlate their logs detect any suspicious activity and provide near real time notification to any potential attacks on their network As part of my project I researched SIEM solutions and ranked them using the model created based on the requirements for the county After the solutions were evaluated researched analyzed and tested it seems that the SIEMs have evolved into SIEM and SOAR solutions Given the current cybersecurity landscape El Dorado county should leverage the results from this report to select which solution they want to pursue to best fit their needs for now and for the future

multiple attack scenarios making it possible to select the countermeasure or group of countermeasures that provides the highest benefit to the organization **Security Information and Event Management a Complete Guide - 2019 Edition** Gerardus Blokdyk,2018-12-21 Name Social Security Number annual income etc What features does your product provide for data analysis Do you have the resources and personnel to effectively manage SIEM How do you define a policy of secure configurations How much are you willing to spend Defining designing creating and implementing a process to solve a challenge or meet an objective is the most valuable role In EVERY group company organization and department Unless you are talking a one time single use project there should be a process Whether that process is managed and implemented by humans AI or a combination of the two it needs to be designed by someone with a complex enough perspective to ask the right questions Someone capable of asking the right questions and step back and say What are we really trying to accomplish here And is there a different way to look at it This Self Assessment empowers people to do just that whether their title is entrepreneur manager consultant Vice President CxO etc they are the people who rule the future They are the person who asks the right questions to make Security Information and Event Management investments work better This Security Information and Event Management All Inclusive Self Assessment enables You to be that person All the tools you need to an in depth Security Information and Event Management Self Assessment Featuring 964 new and updated case based questions organized into seven core areas of process design this Self Assessment will help you identify areas in which Security Information and Event Management improvements can be made In using the questions you will be better able to diagnose Security Information and Event Management projects initiatives organizations businesses and processes using accepted diagnostic standards and practices implement evidence based best practice strategies aligned with overall goals integrate recent advances in Security Information and Event Management and process design strategies into practice according to best practice guidelines Using a Self Assessment tool known as the Security Information and Event Management Scorecard you will develop a clear picture of which Security Information and Event Management areas need attention Your purchase includes access details to the Security Information and Event Management self assessment dashboard download which gives you your dynamically prioritized projects ready tool and shows your organization exactly what to do next You will receive the following contents with New and Updated specific criteria The latest quick edition of the book in PDF The latest complete edition of the book in PDF which criteria correspond to the criteria in The Self Assessment Excel Dashboard Example pre filled Self Assessment Excel Dashboard to get familiar with results generation In depth and specific Security Information and Event Management Checklists Project management checklists and templates to assist with implementation INCLUDES LIFETIME SELF ASSESSMENT UPDATES Every self assessment comes with Lifetime Updates and Lifetime Free Updated Books Lifetime Updates is an industry first feature which allows you to receive verified self assessment updates ensuring you always have the most accurate information at your fingertips Design a Framework for a Security Information and Events
