Selection Criteria Of Waste Processing Technologies:

Waste-to-Energy Jingzheng Ren, 2020-05-12 Waste to Energy Multi criteria Decision Analysis for Sustainability Assessment and Ranking offers a comprehensive view of the technologies and processes for energy generation as a path for waste treatment presenting all the necessary information and tools for selecting the most sustainable waste to energy solution under varying conditions The book combines methods such as lifecycle assessment sustainability assessment multi criteria decision making and multi objective optimization modes In addition it provides an overview of waste to energy feedstocks technologies and implementation then goes on to investigate the critical factors and key enablers that influence the sustainable development of the waste to energy industry The book proposes several decision making methods for the ranking and selection of waste to energy scenarios under different levels of certainty and information availability including multi criteria multi actor and multi attribute methods Finally the book employs lifecycle tools that allow the assessment of economic environmental and social sustainability of waste to energy systems Explores existing and state of the art waste to energy technologies and systems as well as their feedstock requirements Presents a wide perspective of sustainability issues of waste to energy technologies also discussing critical influential factors or key enablers for promoting the sustainable development of waste to energy solutions Provides multi dimensional decision making techniques for choosing the most suitable and sustainable waste to energy technologies for different scenarios *Proceedings of the 7th International Conference on Advances in Energy Research* Manaswita Bose, Anish Modi, 2020-10-17 This book presents selected papers from the 7th International Conference on Advances in Energy Research ICAER 2019 providing a comprehensive coverage encompassing all fields and aspects of energy in terms of generation storage and distribution Themes such as optimization of energy systems energy efficiency economics management and policy and the interlinkages between energy and environment are included The contents of this book will be of use to researchers and policy makers alike *AI Technologies for Enhancing Recycling Processes* Mitra, Debasis, Choudhury, Tanupriya, Madan, Ayush, Chattaraj, Sourav, Pellegrini, Marika, 2025-01-16 AI technologies revolutionize recycling processes by offering innovative solutions to the challenges of waste management and resource recovery By utilizing advanced algorithms machine learning and computer vision organizations may enhance sorting accuracy optimize logistics and improve the efficiency of recycling systems Robotics can identify and separate recyclable materials more effectively than traditional methods reducing contamination and increasing recovery rates Predictive analytics can streamline operations by anticipating demand and adjusting processing capabilities Further exploration into the integration of AI in recycling may increase operational performance while supporting current environmental goals and a circular economy AI Technologies for Enhancing Recycling Processes explores the influential role technologies play in transforming waste management practices and propelling us towards sustainability It examines the pressing international issue of waste accumulation and critiques the inadequacies inherent in conventional disposal methods

revealing how advancements such as automation robotics and state of the art processing methods can revolutionize our approach This book covers topics such as environmental science nanotechnology and sustainability and is a useful resource for computer engineers material scientists environmentalists business owners economists academicians and researchers

Rural Technology Development and Delivery Sreenivas Chigullapalli,S. U. Susha Lekshmi,Abhijit P.

Deshpande,2022-06-22 This book comprises the proceedings of the 2nd international conference on Rural Technology Development and Delivery organized by Rural Technology Action group Indian Institute of Technology IIT Madras The book highlights research on demand driven technologies and innovations mostly on energy environment water resources livelihood and smart technologies for the development of rural India Spanning multi disciplinary research aspects on rural technologies and development this book would be useful for rural entrepreneurs researchers students and academic R D institutions for getting them involved in appropriate rural technology and development

Waste-to-Energy Pooja Sharma,Yen Wah Tong,Sanjeeb Mohapatra,Diane Purchase,Himanshu Kumar Khuntia,Surendra Pratap Singh,2024-11-13 Waste to Energy Sustainable Approaches for Emerging Economies presents the latest developments and applications for the conversion of waste into biofuels and other energy products Divided into two parts Section I reviews the major sources of solid waste and their management strategies in developing countries and includes the collection composition segregation and dispersal of various waste streams as well as the generation of biogas and other value added products Section II examines the transformation of waste into biofuels and the management strategies required to efficiently implement waste to energy processes Methods for the production of hydrogen biomethane biofuels and bioenergy as well as resource recovery are discussed in depth and mathematical models are provided for anaerobic digestion techniques The benefits and challenges of waste to energy as a waste management strategy are explored through dedicated chapters on the techno economics environmental and social regulation and the operation of WtE plants The final chapter of the book presents a lifecycle assessment and environmental impact analysis of the technologies and strategies discussed Critically reviews technologies and procedures for integrating waste management with energy production Evaluates and compares various waste to energy technologies for their utility in producing biofuels Explores the use of waste to energy techniques for mass biotechnological processing of waste

Sustainability Matters (In 2 Volumes) Lin Heng Lye,Victor R Savage,Loke Ming Chou,Liya E

Yu,Harn-wei Kua,2014-04-29 Sustainability Matters is a compilation of some of the best research papers by students from the National University of Singapore s inter disciplinary graduate programme in environmental studies the MSc in Environmental Management MEM This collection is for the period 2009 10 to 2011 12 As the period covers 3 academic years the papers have been split into two volumes Sustainability Matters Asia s Green Challenges and Sustainability Matters Asia s Energy Concerns Green Policies and Environmental Advocacy These two volumes are the third and fourth compilation by the programme and respectively comprise sixteen and fourteen of the best research papers completed during this period The

papers have been edited for brevity These papers analyze the many challenges to effective environmental management in the context of different countries including India Sri Lanka Bangladesh China Hong Kong Nepal Singapore and Thailand and propose insightful solutions The first compilation Sustainability Matters Environmental Management in Asia was published in 2010 World Scientific and comprised the best papers from 2001 2 to 2006 7 The second Sustainability Matters Challenges and Opportunities in Environmental Management in Asia was published in 2011 Pearson and comprised the best papers from 2007 8 to 2008 09 **The Office of Environmental Management Technical Reports** ,1997 *Nuclear Waste*

Handbook of Natural Gas Transmission and Processing Saeid Mokhatab, William A. Poe, 2012-07-02

Acquire the tools and techniques that will help meet the world's growing natural gas demand. Handbook of Natural Gas Transmission and Processing 2nd Edition gives engineers and managers complete coverage of natural gas transmission and processing in the most rapidly growing sector to the petroleum industry. Emphasizing the practical aspects of natural gas production over the theoretical, the authors provide a unique discussion of new technologies that are energy efficient and environmentally appealing at the same time. This 2nd edition examines ways to select the best processing route for optimal design of gas processing plants and includes three new chapters on dynamics of process controls, process modeling and simulation, and optimal design of gas processing plants. Both Chapter 7, Acid Gas Treating, and Chapter 9, Natural Gas Dehydration, are heavily revised. The objective of this work is to provide plant designers and owners/operators methods to decrease construction costs and total cost of ownership while addressing reliability and availability.

Catalytic Process Development for Renewable Materials Pieter Imhof, Jan Cornelis van der Waal, 2013-02-28. Green, clean, and renewable are the hottest keywords for catalysis and industry. This handbook and ready reference is the first to combine the fields of advanced experimentation and catalytic process development for biobased materials in industry. It describes the entire workflow from idea approach, research, and process development right up to commercialization. A large part of the book is devoted to the use of advanced technologies and methodologies like high throughput experimentation as well as reactor and process design models, with a wide selection of real life examples included at each stage. The contributions are from authors at leading companies and institutes providing firsthand information and knowledge that is hard to find elsewhere. This work is aimed at decision makers, engineers, and chemists in industry, chemists and engineers working with renewables, chemists in the field of catalysis, and chemical engineers.
