Saving the Oceans Through Law James Harrison, 2017-10-27 The oceans cover more than seventy per cent of the surface of the planet and they provide many vital ecosystem services However the health of the world s oceans has been deteriorating over the past decades and the protection of the marine environment has emerged as one of the most pressing legal and political challenges for the international community An effective solution depends upon the cooperation of all states towards achieving agreed objectives

This book provides a critical assessment of the role that international law plays in this process by explaining and evaluating the various legal instruments that have been negotiated in this area as well as key trends in global ocean governance. Starting with a detailed analysis of the United Nations Convention on the Law of the Sea, the book considers the main treaties and other legal texts that seek to prevent, reduce and control damage to the marine environment caused by navigation, seabed exploitation, fishing, dumping and land-based activities, as well as emerging pressures such as ocean noise and climate change. The book demonstrates how international institutions have expanded their mandates to address a broader range of marine environmental issues beyond basic problems of pollution control to include the conservation of marine biological diversity and an ecosystems approach to regulation. It also discusses the development of diverse regulatory tools to address anthropogenic impacts on the marine environment and the extent to which states have adopted a precautionary approach in different maritime sectors. Whilst many advances have been made in these matters, this book highlights the need for greater coordination between international institutions as well as the desirability of developing stronger enforcement mechanisms for international environmental rules.

UNCLOS 1982 Commentary Myron H. Nordquist, Satya N. Nandan, James Kraska, 2012-01-20. This Supplement to the seven volume series United Nations Convention on the Law of the Sea 1982 A Commentary prepared at the University of Virginia's Center for Oceans Law and Policy contains additional primary documents and materials directly related to the Convention.

European Union Maritime Safety Policy and International Law Henrik Ringbom, 2008. This book offers a comprehensive international law analysis of the European Union's maritime safety legislation. This is a relatively novel field of activity of the EU but its development has been very rapid. Since 1993 over 40 acts of EU law have been adopted dealing with a variety of subjects such as port State control, classification societies, vessel traffic management, ship construction, environmental protection and pollution sanctions. This legislation is analysed from the point of international law, notably the law of the sea and the international maritime conventions. Regional legislation in a field that is traditionally regulated primarily by means of international conventions is bound to create tensions with the related international conventions and with well established principles of international law. This study assesses how the EU has acted as a flag State, port State and coastal State and measures the trends in this development against the international legal framework. More detailed legal analyses are offered for specific aspects of EU legislation that are considered to be particularly interesting from an international law point of view. The relationship between EU law and international law within the internal EU legal system is also analysed from the specific perspective of maritime safety law.

Navigational Rights and Freedoms and the New Law of the Sea Donald R. Rothwell, Sam Bateman, 2021-10-18. Navigational rights and freedoms have been central to the development of the law of the sea since the original debates over whether the seas were open or closed to maritime traffic. The 1982 UN Convention on the Law of the Sea recognises the legitimate rights of coastal states to proclaim sovereignty and assert jurisdiction over vast areas of maritime space. In return

maritime states are given a range of navigational rights over waters ranging from the territorial sea through to the high sea. The new regime of the law of the sea created by the Convention presents an opportunity to review developments in the law of navigational rights and freedoms. This book assesses the navigational regime established by the 1982 Convention with emphasis given to the continuing importance of the freedom of the seas. Navigation in the territorial sea and international straits is reviewed especially in the Straits of Malacca and Singapore and the Torres Strait. Archipelagic navigation from the perspective of two claimant states, Indonesia and the Philippines, and a user state, South Korea, is also considered. The interaction of environmental concerns with navigational rights is an important feature of the current law of the sea regime with relevant conventions assessed and the role of the International Maritime Organization in developing navigational standards considered. Both European and Canadian practice in the protection of sensitive marine environments and the impact upon navigational rights is also considered. Finally, the roles of the International Tribunal for the Law of the Sea and the International Maritime Organization in dispute resolution are reviewed before a concluding consideration of the future for navigational rights and freedoms in the twenty-first century.

Guide to the Collision Avoidance Rules A. N. Cockcroft, J. N. F. Lameijer, 2003-11-11. A Guide to the Collision Avoidance Rules is the essential reference to the safe operation of all vessels at sea. Published continuously since 1965, this respected and expert guide is the classic text for all who need to practically and legally understand and comply with the Rules. This sixth edition incorporates all of the amendments to the International Regulations for Preventing Collisions at Sea which came into force in November 2003. The book sets out all of the Rules with clear explanation of their meaning and gives detailed examples of how the rules have been used in practice by seafarers as well as excerpts from Court judgements to illustrate how they have been interpreted in practice. Written for masters, navigating officers, senior crew, cadets and those in training, plus ship operators, marine lawyers and anyone concerned with the safe operation of shipping, this is an essential reference for at sea and on shore. Fully revised to meet the November 2003 IMO amendments. The definitive text for all concerned with both the practical and legal aspects of marine safety. Includes a colour section with examples of ships' lights to aid recognition of signals.

Marine Environment Protection and Biodiversity Conservation Julian Roberts, 2006-11-23. Despite the potential benefits that PSSA designation can deliver, recent practice both within the IMO and by individual member States has considerably undermined confidence in this emerging concept. The focus of this book is on the events within the IMO that have led to this lack of confidence. In doing so, this book presents an examination of coastal State practice with the PSSA concept. In undertaking this analysis, the research provides evidence of the value of the PSSA concept but also demonstrates its limitations. In this regard, the book presents a reality check which seeks to rationalise some of the heightened expectations with the concept that are apparent in the current debate. The research argues that States may seek to designate PSSAs more for their iconic status than for any demonstrable environmental benefits that may be realised.

Port State Control Oya Özçayır, 2018-05-08. Port State Control

Second Edition is a comprehensive publication dealing with the full implications and regulations of port State control. It provides a detailed analysis of the legal framework relating to port State control including the most recent developments in this area. It covers not only the regional agreements on port State control and the EU legislation on this subject but also the background of the port State control process, its implications in practice and its effect on the ISM Code and the classification societies. The book covers topics such as Amendments and changes to the regional port state control systems. The addition of an appeal procedure to the Paris MOU. Issues related to the ports of refuge and the urgency for authorities to draw up appropriate plans for places of refuge following the recent incidents. The ISPS Code for maritime security in the light of newly recognised vulnerability against terrorist attacks. Update to Equasis Progress with Qualship regime under US Port State Control system. This book will be an invaluable reference tool for shipping lawyers around the world. *International Organizations and the Law of the Sea 1998* Barbara Kwiatkowska, Harm Dotinga, Erik J. Molenaar, Alex G. Oude Elferink, Alfred H.A. Soons, 2021-08-04. Now in its 14th year the NILOS Documentary Yearbook provides the reader with an excellent collection of documents related to ocean affairs and the law of the sea issued each year by organizations, organs and bodies of the United Nations system. Documents of the UN General Assembly Meeting of State Parties to the 1982 UN Law of the Sea Convention, CLCS, ISBA, ITLOS. Follow Up to the UN Straddling Fish Stocks and Small Island States Conferences. Panama Canal, ECOSOC, UNEP and UNCTAD are included first, followed by the documents of FAO, IAEA, IMO, UNESCO, IOC. As in the previous volumes, documents which were issued in the course of 1998 are reproduced while other relevant documents are listed. The NILOS Documentary Yearbook has proved to be of invaluable assistance in facilitating access by the community of scholars and practitioners in ocean affairs and the law of the sea to essential documentation. The entry of the 1992 UN Law of the Sea Convention into force on 16th November 1994 and of the Part XI Agreement on 28 July 1996 and progress in the implementation of Chapter 17 of Agenda 21 make continuation of this assistance of particular significance in the years to come. Volume 14 contains Special Report by Editor in Chief Barbara Kwiatkowska on The Law of the Sea Related Cases in the International Court of Justice During the Presidency of Judge Stephen M. Schwebel 1997-2000. It explores the unique role of the ICJ as the principal judicial organ of the United Nations in the development of ocean affairs and the law of the sea in the context of an ongoing follow up to the Overall Review and Appraisal of the UNCED Agenda 21. The members of the Yearbook's Advisory Board are Judges Abdul Koroma and Shigeru Oda of the ICJ, Judges Thomas Mensah, Dolliver Nelson and Tullio Treves of the ITLOS as well as Rosalie Balkin, Edward Brown, Lee Kimball, Bernard Oxman and Shabtai Rosenne.

The Regulation of International Shipping: International and Comparative Perspectives Aldo Chircop, Norman Letalik, Ted L. McDorman, Susan Rolston, 2012-06-22. In this work the contributors examine the public law and policy framework for shipping and maritime trade, the complex relationship between shipping and the marine environment. *The Legal Regime of Straits* Hugo Caminos, Vincent P. Cogliati-Bantz, 2014-12-22. The right of transit passage in straits and the analogous right

of archipelagic sealanes passage in archipelagic states negotiated in the 1970s and embodied in the 1982 UNCLOS sought to approximate the freedom of navigation and overflight while expressly recognising the sovereignty or jurisdiction of the coastal state over the waters concerned However the allocation of rights and duties of the coastal state and third states is open to interpretation Recent developments in state practice such as Australia s requirement of compulsory pilotage in the Torres Strait the bridge across the Great Belt and the proposals for a bridge across the Strait of Messina the enhanced environmental standards applicable in the Strait of Bonifacio and Canada s claims over the Arctic Route make it necessary to reassess the whole common law of straits

The Legal Regime of Straits examines the complex relationship between the coastal state and the international community **The Oxford Handbook of the Law of the Sea** Donald Rothwell,Alex G. Oude Elferink,Karen Nadine Scott,Tim Stephens (Law teacher),2015 Recent maritime disputes environmental disasters and piracy have raised the profile of the law of the sea This Oxford Handbook brings together high level analysis of all of its key aspects examining the role of particular regions in the development of the law of the sea management of the oceans resources and critical contemporary debates

Changes in the Arctic Environment and the Law of the Sea Myron Nordquist,John Norton Moore,Tomas H. Heidar,2010-05-03 While the Arctic Ocean has long been covered with ice recent changes in climate have caused the ice to melt spurring both conservation challenges to the region s environment and biodiversity as well as new opportunities for navigation and natural resource development Changes in the Arctic Environment and the Law of the Sea offers policy and legal guidance in response to these new challenges Synthesizing the presentations of leading experts at Changes in the Arctic Environment and the Law of the Sea meeting held in May 2009 in Seward Alaska the topics explored in this volume include the political context and scientific background marine transport environment and biodiversity in addition to offshore petroleum and the status of Spitsbergen A list of selected Internet resources provides links for additional websites as well as PowerPoint files from presentations given at the meeting Changes in the Arctic Environment and the Law of the Sea is based on the 33rd Annual Conference of the Center for Oceans Law and Policy a primary sponsor along with the Law of the Sea Institute of Iceland as well as with the U S Arctic Commission the University of Alaska Fairbanks and the Law of the Sea Institute Law School Boalt Hall University of California Berkeley
