Simply Complexity Neil Johnson,2009-10-01 The new branch of science which will reveal how to avoid the rush hour overcome cancer and find the perfect date What do traffic jams stock market crashes and wars have in common They are all explained using complexity an unsolved puzzle that many researchers believe is the key to predicting and ultimately solving everything from terrorist attacks and pandemic viruses right down to rush hour traffic congestion Complexity is considered by many to be the single most important scientific development since general relativity and promises to make sense of no less than the very heart of the Universe Using it scientists can find order emerging from seemingly random interactions of all kinds from something as simple as flipping coins through to more challenging problems such as predicting shopping habits the patterns in modern jazz and the growth of cancer tumours *Plato's Pigs and Other Ruminations* M. D.

Usher,2020-10-15 The Greeks and Romans have been charged with destroying the ecosystems within which they lived In this book however M D Usher argues rather that we can find in their lives and thought the origin of modern ideas about systems and sustainability important topics for humans today and in the future With chapters running the gamut of Greek and Roman experience from the Presocratics and Plato to Roman agronomy and the Benedictine Rule Plato s Pigs brings together unlikely bedfellows both ancient and modern to reveal surprising connections Lively prose and liberal use of anecdotal detail including an afterword about the author s own experiments with sustainable living on his sheep farm in Vermont add a strong authorial voice In short this is a unique first of its kind book that is sure to be of interest to anyone working in Classics environmental studies philosophy ecology or the history of ideas **The Idea of International Human Rights Law** Steven

Wheatley,2019-01-17 International human rights law has emerged as an academic subject in its own right separate from but still related to international law This book explains the distinctive nature of this discipline by examining the influence of the idea of human rights on general international law Rather than make use of a particular moral philosophy or political theory it explains human rights by examining the way the term is deployed in legal practice on the understanding that words are given meaning through their use Relying on complexity theory to make sense of the legal practice of the United Nations the core human rights treaties and customary international law the work demonstrates the emergence of the moral concept of human rights as a fact of the social world It reveals the dynamic nature of this concept and the influence of the idea on the legal practice a fact that explains the fragmentation of international law and special nature of international human rights law

Contemporary Issues in International Arbitration and Mediation Arthur W. Econophysics of Agent-Based Models Frédéric Abergel,Hideaki Aoyama,Bikas K. Chakrabarti,Anirban Chakraborti,Asim Ghosh,2013-09-07 The primary goal of this book is to present the research findings and conclusions of

physicists economists mathematicians and financial engineers working in the field of Econophysics who have undertaken agent based modelling comparison with empirical studies and related investigations Most standard economic models assume the existence of the representative agent who is perfectly rational and applies the utility maximization principle when taking action One reason for this is the desire to keep models mathematically tractable no tools are available to economists for solving non linear models of heterogeneous adaptive agents without explicit optimization In contrast multi agent models which originated from statistical physics considerations allow us to go beyond the prototype theories of traditional economics involving the representative agent This book is based on the Econophys Kolkata VII Workshop at which many such modelling efforts were presented In the book leading researchers in their fields report on their latest work consider recent developments and review the contemporary literature

Dimensions of War Samuel Solvit, 2012-11-01 With today mutable identities and various kinds of warfare how do we further our understanding of war Reviewing influential war theories from Machiavelli to the present this book analyses how they reduce war in terms of time space interaction purpose aim and or evolution Considering war as a complex adaptive system allows us to increase our overall comprehension of contemporary wars

Two's Company, Three is Complexity Neil F. Johnson, 2007 In *Two's Company Three is Complexity* Neil Johnson draws on his experience as a leading researcher in the field to explore the surprising ways in which order eventually emerges from the interaction of all things Relevant across the whole breadth of social studies and science from pubs to plants Johnson utilizes a wealth of real life examples as he leads us on a brilliantly entertaining romp through chaos game theory economics and even jazz ultimately proving that complexity lies at the heart of the Universe itself

Portraits of Complexity Maynard Martin Baldwin, 1975 *Perspectives on Science and Christian Faith*, 2002 *The Patterns of Architecture* Mark Garcia, 2009-12-21 This issue explores the creation materialisation and theorisation of some of the world's most significant and spectacularly patterned spaces It investigates how interiors buildings cities and landscapes are patterned through design production and manufacturing use time accident and perception It also brings into focus how contemporary advanced spatial practices and CAD CAM are now pushing patterns to encompass a greater range of structural programmatic aesthetic and material effects and properties
