Haematology Dr. Gary Moore, Dr. Gavin Knight, Andrew D. Blann, 2023 This textbook provides a broad ranging overview of the study of blood from its physiology to the key pathophysiological states that can arise It demonstrates throughout how the physiology underpins the key investigations carried out by a biomedical scientist forging a clear link between science and practice

Blood Science Andrew Blann, Nessar Ahmed, 2014-01-02 Blood Science is a relatively new discipline which merges biochemistry haematology immunology transfusion science and genetics This bringing together of traditional disciplines requires a corresponding change in education and training for healthcare scientists and Blood Science Principles and Pathology is written in response to this emerging need An introduction to the subject and an overview of the techniques used in blood science are followed by a series of chapters based on groups of analytes investigated in blood red blood cells white blood cells and platelets followed by the constituents of plasma including waste products electrolytes glucose lipids enzymes hormones nutrients drugs poisons and others Each chapter is supported by learning objectives summaries and further information and a focus is given to chapter specific case studies with interpretation to demonstrate how laboratory data in conjunction with clinical details is utilised when investigating patients with actual or suspected disease Finally a separate chapter offers more detailed case reports that integrate the different aspects of blood science Undergraduate students taking blood science modules as part of their BSc programmes in Biomedical and Healthcare Sciences will appreciate the level of integration between clinical biochemistry and haematology In addition this book will provide suitable initial reading for those students embarking on blood science modules on MSc programmes and will be of value to new graduates entering the profession and starting their career in blood science departments by supplementing practice based training with the required theoretical underpinning This book is approved by the Institute of Biomedical Science and written by its expert writers many of whom work on the Institute's advisory panels

Haematology Chris Pallister, 1999 The Biomedical Sciences Explained series has been designed specifically to meet the needs of today's undergraduates studying biomedical sciences Each volume in the series covers a key biomedical science topic enabling the student to select the volumes required for their chosen topics and build up their own personal textbook in biomedical sciences Using the BMS Explained Series students can build up their own personal textbook in biomedical sciences written specifically for them rather than buying an enormous textbook which is too detailed when only studying a topic for one or two modules Each volume provides a core of knowledge from which the student can then go on to more advanced study in their chosen subject Haematology emphasizes the scientific principles which underpin our understanding

of the blood in health and disease It seeks to integrate knowledge of biochemistry physiology genetics and cell biology and apply them to the study of the blood although little prior knowledge is assumed *Transfusion and Transplantation Science*

Neil Avent,2018-04-19 Biomedical scientists are the foundation of modern healthcare from cancer screening to diagnosing HIV from blood transfusion for surgery to food poisoning and infection control Without biomedical scientists the diagnosis of disease the evaluation of the effectiveness of treatment and research into the causes and cures of disease would not be possible The Fundamentals of Biomedical Science series has been written to reflect the challenges of practicing biomedical science today It draws together essential basic science with insights into laboratory practice to show how an understanding of the biology of disease is coupled to the analytical approaches that lead to diagnosis Assuming only a minimum of prior knowledge the series reviews the full range of disciplines to which a Biomedical Scientist may be exposed from microbiology to cytopathology to transfusion science The science of transfusion and transplantation demands a multifaceted understanding of immunology haematology and genetics from the biomedical scientist Transfusion and Transplantation Science synthesizes the essential concepts of these subjects and presents them within the practical framework of the hospital banking and transplantation centre providing you with the knowledge and skills to specialize in this discipline *Hematology E-Book*
