Handbook Of Career Development International Perspectives International And Cultural Psychology:

Handbook of Career Development Gideon Arulmani, Anuradha J. Bakshi, Frederick T. L. Leong, A. G. Watts, 2014-02-08

This book is focused on work occupation and career development themes that are fundamental to a wide range of human activities and relevant across all cultures. Yet theorizing and model building about this most ubiquitous of human activities from international perspectives have not been vigorous. An examination of the literature pertaining to career development counseling and guidance that has developed over the last fifty years reveals that theorizing and model building have been largely dominated by Western epistemologies. Some of the largest workforces in the world are in the developing world. Career guidance is rapidly emerging as a strongly felt need in these contexts. If more relevant models are to be developed, frameworks from other cultures and economies must be recognized as providing constructs that would offer a deeper understanding of career development. This does not mean that existing ideas are to be discarded. Instead, an integrative approach that blends universal principles with particular needs could offer a framework for theorizing research and practice that has wider relevance. The central objective of this handbook is to draw the wisdom and experiences of different cultures together to consider both universal and specific principles for career guidance and counseling that are socially and economically relevant to contemporary challenges and issues. This book is focused on extending existing concepts to broader contexts as well as introducing new concepts relevant to the discipline of career guidance and counseling. Handbook of Career Development Gideon Arulmani, Anuradha J. Bakshi, Frederick T. L. Leong, 2014-02-28

The Oxford Handbook of Career Development Peter J. Robertson, Tristram Hooley, Phil McCash, 2021. Abstract: The handbook seeks to provide a state of the art reference point for the field of career development. It engages in a transdisciplinary and international dialogue that explores current ideas and debates from a variety of viewpoints including socio-economic, political, educational, and social justice perspectives. Career development is broadly defined to encompass both individuals' experience of their own careers and the full range of support services for career planning and transitions. The handbook is divided into three sections. The first section explores the economic, educational, and public policy contexts within which careers are enacted. The second section explores the rich conceptual landscape of career theory. The third section addresses the broad spectrum of helping practices to support both individuals and groups, including career guidance, career counseling, and career learning interventions. Keywords: Career, career development, career counseling, career guidance, career learning, career theory, public policy, social justice.
