Finally, concerning a third, Barro's methodology may be problematic. In his paper, Barro (1997) uses a series of 1000 random draws from the distribution of the residuals to generate a distribution of the residuals. This is done to generate a distribution of the residuals that is consistent with the distribution of the residuals in the data. However, this method may be problematic because it does not take into account the fact that the residuals are not independent. In fact, the residuals are correlated, and this correlation may be important for the distribution of the residuals. Therefore, the distribution of the residuals generated by Barro's method may not be the same as the distribution of the residuals in the data.

Employment in health care professions were also affected with people with severe disability to the professions or disability as barriers to the labor market (employment protection staff, job placement services and the labor market) excluded to work.
