Pilkington, 2010-06-24 In a perfect world a story such as I am about to relate could never have happened and would never have needed to be told but this is not a perfect world and life does not always treat us in the manner to which we feel we deserve We have become accustomed to accepting mediocrity and bureaucratic incompetence Indifference and ambivalence are becoming the accepted norm We live in a democratic

society where less than half the eligible members actually participate and as a result the officials we elect owe more allegiance to the special interests that fund and support them than to the constituents they purport to represent As a result we have enabled a system to exist where the interests of business overshadow the rights of the individual a system where we permit industry to write the regulations intended to control their activities We live in a society where human life is measured and analyzed compared and evaluated against the cost of doing business where litigators feed on the misery of others while doing little to prevent the carnage on which they feed and depend While a kinder and gentler government stands idly by protecting the special interests that feed the political system while hiding behind cost to benefit studies to justify their inaction Under current United States Coast Guard policy a Significant Casualty is one that may involve multiple deaths the loss of a ship of five hundred gross tons or larger or one that if properly investigated could lead to the implementation of changes in current standards of safety And it is only these Significant Casualties that by regulation merit proper investigation The following is a story of a young man who went off to work one morning never to return But mostly it is the story of a man who like all men should never be allowed to be remembered as only another statistic This is the story of one such Significant Casualty The five year quest receives a final punctuation when the father is granted Party in Interest status and has his son s case properly reviewed at a formal United States Coast Guard Investigation An Investigation that not only looks to the fatality but at the regulatory atmosphere that allowed the conditions to exist The story is timely as it highlights not only a father s quest to clear his son but also the illegal and improper inspection of oil drilling facilities in the US Gulf of Mexico According to World Oil Feb 2010 issue at the end of 2009 there were 2 237 oil wells in the Federal waters of the Gulf and 242 more in the state waters of Louisiana All working under regulations written by the industry An industry more interested in profits than safety In April of 2010 President Barack Obama while addressing the issues surrounding mine safety following the deaths in West Virginia was quoted as saying A failure first and foremost of management a failure of oversight and a failure of laws so riddled with loopholes that companies repeatedly can violate safety regulations without penalty Those same comments ring true for the oil drilling companies of this country As horrific as the mine disaster was in West Virginia more workers die in the underwater workplace each year then do in all the nation s mines **Commerce Business Daily**,2000-12 Forthcoming Books Rose Arny,2000 Disaster Response Practices Michael Madigan,2024-01-12 This book provides guidelines for emergency managers responders and health care professionals to establish a mass casualty mass fatality MC MF management plan It identifies a need for a stronger and more global management structure for MC MF events that includes standardized practices of identification disposition and possible repatriation to restore the situation to pre event levels This book covers this comprehensive process including disaster mortuary operational response teams DMORTs simple triage and rapid treatment START and national nurse response teams It also demonstrates leadership in MC MF events within government agencies the public sector and international organizations featuring case studies scenario

Preparedness and Response to a Rural Mass Casualty Incident Institute of Medicine,Board on Health Sciences Policy,Forum on Medical and Public Health Preparedness for Catastrophic Events,2011-05-18 Problems contacting emergency services and delayed assistance are not unusual when incidents occur in rural areas and the consequences can be devastating particularly with mass casualty incidents The IOM s Forum on Medical and Public Health Preparedness for Catastrophic Events held a workshop to examine the current capabilities of emergency response systems and the future opportunities to improve mass casualty response in rural communities **Multi-casualty Incident** Ontario. Ministry of Health. Ambulance Services Branch,1988 **Disasters and Mass Casualty Incidents** Mauricio Lynn,Howard Lieberman,Lior Lynn,Gerd Daniel Pust,Kenneth Stahl,Daniel Dante Yeh,Tanya Zakrison,2018-11-10 Mass Casualty events may occur as a result of natural or human caused disasters or after an act of terrorism The planning and response to disasters and catastrophes needs to take into consideration the distinction between progressive and sudden events Insidious or slowly progressive disasters produce a large number of victims but over a prolonged time period with different peaks in the severity of patients presenting to the hospital For example radiation events will produce a large number of victims who will present days weeks months or years after exposure depending on the dose of radiation received The spread of a

biological agent or a pandemic will produce an extremely high number of victims who will present to hospitals during days to weeks after the initial event depending on the agent and progression of symptoms. On the other hand in a sudden disaster there is an abrupt surge of victims resulting from an event such as an explosion or a chemical release. After the sarin gas attack in a Tokyo subway in 1995 a total of 5500 victims were injured and required medical attention at local hospitals immediately after the attack. The car bomb that exploded near the American Embassy in Nairobi Kenya killed 213 people and simultaneously produced 4044 injured patients many requiring medical care at local hospitals. The Madrid train bombing in March 2004 produced more than 2000 injured victims in minutes overwhelming the city's healthcare facilities. More than 500 injured patients were treated at local hospital after the mass shooting in Las Vegas. Finally earthquakes may produce a large number of victims in areas in which the medical facilities are partially or completely destroyed. Sudden events bring an immediate operational challenge to community healthcare systems many of which are already operating at or above capacity. The pre hospital as well as hospital planning and response to sudden mass casualty incidents (SMCI) is extremely challenging and requires a standard and protocol driven approach. Many textbooks have been published on Disaster Medicine although they may serve as an excellent reference they do not provide a rapid practical approach for management of SMCI. The first edition of Mass Casualty Incidents: The Nuts and Bolts of Preparedness and Response for Acute Disasters dealt exclusively with sudden mass casualty incidents. The second edition will expand its focus and include planning and response for insidious and protracted disasters as well. This new book is designed to provide a practical and operational approach to planning response and medical management of sudden as well as slow progressive events. The target audience of the second edition will be health care professionals and institutions as well as allied organizations which respond to disasters and mass casualty incidents. Parts I and II are essentially the first edition of the book and consist of planning of personnel logistic support transport of patients and equipment and response algorithms. These 2 parts will be revised and updated and include lessons learned from major mass shootings that occurred recently in the United States and other parts of the world. Part III will describe the planning process for progressive disasters and include response algorithms and checklists. Part IV will handle humanitarian and mental health problems commonly encountered in disaster areas. Part V will deal with team work and communication both critical topics when handling catastrophes and mass casualty incidents. This new book will be a comprehensive tool for healthcare professionals and managers and should perform demonstrably better in sales and downloads. It will be of value at the pre hospital as well as the hospital level to plan and respond to the majority of catastrophes and mass casualty incidents.
