Handbook of Political Violence and Children Charles W. Greenbaum, Mohammed Haj Yahia, Carolyn Hamilton, 2021

Political violence has disrupted the lives of millions of children around the world. Responding to the gravity and scale of this phenomenon, this volume is intended to stimulate discussion and research on children's exposure to political violence and its psycho-social effects. It brings together for the first time in a single volume three areas of scientific activity in different disciplines: research on effects, programs for intervention, and laws and policy for prevention of political violence to children. Section I presents reviews of research on children exposed to political violence, including child soldiers and refugee children, as well as an examination of methodology and ethics. Section II contains research on interventions with children exposed to political violence, including individual therapy and school, family, and community interventions. Section III covers legal and social issues in deterring the recruitment of children to violent causes and protecting children in armed conflict. Pulling together the work of leading scholars and practitioners in the social sciences and international law, this volume argues that the prevention of political violence to children is possible and it provides a crucial basis for ideas for prevention.

Research Handbook on Child Soldiers Mark A. Drumbl, Justine C. Barrett, 2019. Child soldiers remain poorly understood and inadequately protected despite significant media attention and many policy initiatives. This Research Handbook aims to redress this troubling gap. It offers a reflective, fresh, and nuanced review of the complex issue of child soldiering. The Handbook brings together scholars from six continents, diverse experiences, and a broad range of disciplines. Along the way, it unpacks the life cycle of youth and militarization from recruitment to demobilization to return to civilian life. The overarching aim of the Handbook is to render the invisible visible, the contributions map the unmapped, and chart new directions. Challenging prevailing assumptions and conceptions, the Research Handbook on Child Soldiers focuses on adversity but also capacity, emphasising the resilience, humanity, and potentiality of children affected rather than afflicted by armed conflict.

Finding Safe Harbour Emily Pelley, 2022-02-15. The global refugee crisis is staggering in scope. The United Nations Refugee Agency reported that 79.5 million people were displaced worldwide in 2019, and over half of all displaced persons were under eighteen. As the number of children and teenagers seeking asylum continues to grow, the impact of displacement on a young person's well-being and development over the long term requires further study. In *Finding Safe Harbour*, Emily Pelley investigates the current response to refugee youth in Canada by highlighting how Halifax, Nova Scotia, as a mid-sized urban centre, has mobilized services and resources to support young people seeking refuge. Opening with a broad contextual introduction to the global crisis of displacement and the impact of violence and armed conflict on young people, Pelley focuses on the reciprocal adaptation that is required for the long-term integration of displaced youth into the receiving society. A concise and illuminating study on refugee resettlement, *Finding Safe Harbour* concludes with an in-depth discussion of how cities can optimize resilience resources through meaningful engagement with refugee youth.

Small Arms Mia Bloom, 2019-05-15 Why do terrorist organizations use children to support their cause and carry out their activities Small Arms uncovers the brutal truth behind the mobilization of children by terrorist groups Mia Bloom and John Horgan show us the grim underbelly of society that allows and even encourages the use of children to conduct terrorist activities They provide readers with the who what when why and how of this increasingly concerning situation illuminating a phenomenon that to most of us seems abhorrent And yet they argue for terrorist groups the use of children carries many benefits Children possess skills that adults lack They often bring innovation and creativity Children are in fact a superb demographic from which to recruit if you are a terrorist Small Arms answers questions about

recruitment strategies and tactics determines what makes a child terrorist and what makes him or her different from an adult one and charts the ways in which organizations use them The unconventional focus on child and youth militants allows the authors to in essence give us a biography of the child terrorist and the organizations that use them We are taken inside the mind of the adult and the child to witness that which perhaps most scares us *Social Work Practice with War-Affected Children* Myriam Denov, Meaghan C. Shevell, 2020-06-09 This book explains the effects of war and armed conflict on individual children and their family system and how culturally responsive social work practice should take into account the diversity and heterogeneity of their needs and lived experiences Unpacking social work practice with children and families affected by war and migration the volume provides a valuable toolkit for practitioners educators researchers and service providers that work with war affected populations around the globe The contributions suggest that fostering a family approach allotting careful attention to context and culture and linking the arts and participation with social work practice can all be vital to enhancing the research education and practice around working with children and families affected by armed conflict Providing a critical reflection of social work education and practice this book will be of interest to practitioners in the field of social work as well as researchers studying the social effects of migration This book was originally published as a special issue of the Journal of Family Social Work

Children Affected by Armed Conflict Myriam Denov, Bree Akesson, 2017-08-08 Societal turbulence state collapse religious and ethnic conflict poverty hunger and social exclusion all underlie children s involvement in armed conflict Drawing from empirical studies in eleven conflict ridden countries including Pakistan Sri Lanka Thailand Colombia Uganda Palestine Somalia Liberia Sierra Leone Sudan and South Sudan Children Affected by Armed Conflict crosses cultures and contexts to capture a range of perspectives on the realities of armed conflict and its aftermath for children Children Affected by Armed Conflict upends traditional views by emphasizing the experience of girls as well as boys the unique social and contextual backgrounds of war affected children and the resilience and agency such children often display Including children who are victims of participants in and witnesses to armed conflict in their analyses the contributors to this volume highlight innovative methodologies that directly involve war affected children in the research process This validates the perspectives of children and ensures more effective outcomes in postwar reintegration and recovery Deficits based models do not account for the realities many war affected children face The alternative approaches presented in this edited collection which acknowledge the realities of both trauma and resilience aim to generate more effective policies and intervention strategies in the face of a growing global public health crisis

Child, Adolescent and Family Refugee Mental Health Suzan J. Song, Peter Ventevogel, 2020-06-15 More than half of the 25.9 million refugees in the world are under the age of 18 and the mental health of these children and adolescents constitutes a growing global public health priority Refugee children and their families are at increased risk to develop mental health problems but they often face major challenges in accessing adequate treatment and mental health professionals

frequently feel ill equipped to assist this group Refugees are faced with a plethora of issues including the ambiguous loss of loved ones psychological trauma related to past experiences of violence and atrocities the complexities of daily life as a refugee and the challenges to adapt to new systems of care and support Refugees life circumstances all too often undermine their agency as they face discrimination stigma and social isolation or exclusion Refugees are frequently disconnected from the usual family and community supports that they once had which creates additional mental distress As parents struggle with these changes their children often find it even more difficult to adapt and connect with them This all leads to increased prevalence of mental health conditions among refugees Humanitarian policies recommend family centered interventions that are multi sectoral multi disciplinary and focus on optimizing resource utilization Over the last decade a considerable body of research has emerged around socio ecological models of mental health family and community approaches and resilience and strengths based theories but these insights are insufficiently incorporated in the practice of mental health care for refugee children Clinicians often struggle to grasp the common unique stressors that families face and are not familiar with working with families as units for intervention Using culturally and contextually informed assessment methods and family oriented management approaches not only help individual children or adolescents but also their families This book aims to provide an overview of the latest theoretical insights from research on sociocultural aspects of mental health and connect these with clinical insights from practical mental health care provision Using strengths based resiliency oriented and family centered approaches can enrich clinical practice in refugee mental health but clinicians need to translate the emerging evidence into concrete steps and interventions This requires additional skills for the assessment and management of mental health conditions in refugee children and families The chapters in this book are written by a diverse group of authors using global multi disciplinary approaches The chapters provide examples from various contexts including refugees who are displaced to neighboring countries refugees on the move and refugees and asylum seekers in resettlement settings This book is therefore a unique resource for clinicians researchers and policy makers working on mental health issues of refugee children and adolescents around the world
