groups include the marsupials native ungulates the xenarthrans armadillos anteaters sloths the caviomorphs rodents and the platyrrhine monkeys Chapters 9 and 10 address the Antarctic La Meseta fossils and the Colombian La Venta fossil faunal assemblages Chapter 11 discusses the neotropical mammals that invaded the Caribbean Islands and illustrates the influence South America has had on adjacent faunas Chapter 12 describes the origin of the Amazon River and the role it has played in the evolution of the mammals and other flora and fauna Chapter 13 tells the story of the Great American Biotic Interchange GABI and chapter 14 follows this up with a discussion of the Pleistocene mammal communities and their eventual extinction Chapter 15 concludes the text by discussing the modern mammals of South America
