Hijra En Egypte:

From Byzantine to Islamic Egypt Maged S. A. Mikhail, 2014-08-25 The conquest of Egypt by Islamic armies under the command of Amr ibn al As in the seventh century transformed medieval Egyptian society Seeking to uncover the broader cultural changes of the period by drawing on a wide array of literary and documentary sources Maged Mikhail stresses the cultural and institutional developments that punctuated the histories of Christians and Muslims in the province under early Islamic rule From Byzantine to Islamic Egypt traces how the largely agrarian Egyptian society responded to the influx of Arabic and Islam the means by which the Coptic Church constructed its sectarian identity the Islamisation of the administrative classes and how these factors converged to create a new medieval society The result is a fascinating and essential study for scholars of Byzantine and early Islamic Egypt

The Multilingual Experience in Egypt, from the Ptolemies to the Abbasids Arietta Papaconstantinou, 2016-12-14 For over a millennium and a half Egypt was home to at least two commonly used languages of communication Although this situation is by no means exceptional in the ancient and medieval worlds the wealth of documentary sources preserved by Egypt's papyri makes the country a privileged observation ground for the study of ancient multilingualism One of the greatest contributions of papyri to this subject is that they capture more linguistic registers than other ancient and medieval sources since they range from very private documents not meant by their author to be read by future generations to official documents produced by the administration which are preserved in their original form This collection of essays aims to make this wealth better known as well as to give a diachronic view of multilingual practices in Egypt from the arrival of the Greeks as a political force in the country with Alexander the Great to the beginnings of Abbasid rule when Greek and slowly also Coptic receded from the documentary record The first section of the book gives an overview of the documentary sources for this subject which for ancient history standards are very rich and as yet under exploited The second part contains several case studies from different periods that deal with language use in contexts of varying breadth and scope from its ritual use in magic or the liturgy to private letters and state administration

Coptic Interference in the Greek Letters from Egypt Victoria Beatrix Maria Fendel, 2022 A detailed analysis of the syntax of early Byzantine Greek texts from Egypt that traces the bilingual interference in the syntax of verbs adverbial phrases clause linkage as well as in semi formulaic expressions and formulaic frames

Islamic Law and the Crisis of the Reconquista Alan Verskin, 2015-01-27 The Reconquista left unprecedentedly large numbers of Muslims living under Christian rule Since Islamic religious and legal institutions had been developed by scholars who lived under Muslim rule and who assumed this condition as a given how Muslims should proceed in the absence of such rule became the subject of extensive intellectual investigation In *Islamic Law and the Crisis of the Reconquista* Alan Verskin examines the way in which the Iberian school of Maliki law developed in response to the political theological and practical difficulties posed by the Reconquista He shows how religious concepts even those very central to the Islamic religious experience could be rethought and reinterpreted in order to respond to the changing needs of Muslims
