Histología Veterinaria:

Atlas de Histología de vertebrados ,2002 Archivos de Medicina Veterinaria ,1996 **Manual de histología general veterinaria** Milagros T. Alonso de León,Magalys Garay Durba,Nelson Izquierdo Pérez,2020-07-29 El Manual de Histología General surgió como una respuesta a la necesidad de un texto actualizado para la asignatura Histología General que respondiera al plan de estudios actual para la carrera de Medicina Veterinaria. Los contenidos se desarrollaron en tres partes: la primera donde se estudia la estructura de la célula animal relacionada con las principales funciones que desarrolla; la segunda incluye el desarrollo embrionario de mamíferos, aves y peces; y la tercera que estudia el origen embriológico de la microestructura y las funciones de los tejidos básicos. Las imágenes histológicas utilizadas han sido tomadas del archivo de micropreparaciones del Laboratorio de Histología de la Facultad de Ciencias Agropecuarias de la Universidad de Camagüey; los esquemas e ilustraciones fueron tomadas de diferentes fuentes y trabajadas por los autores con la cooperación de los estudiantes Robert González Chávez Medicina Veterinaria y Alejandro Bertot Garay Arquitectura.

Histología veterinaria Horst-Dieter Dellmann,1980-01-01 *Atlas práctico de histología* ,2000 Este Atlas constituye una guía visual de la estructura microscópica del cuerpo humano insustituible para la comprensión de las prácticas de laboratorio y de gran utilidad como complemento a los textos de Histología. Está especialmente dirigido a los estudiantes de Medicina y Odontología, aunque también puede interesar a Biólogos y Veterinarios. Esta nueva edición actualizada del Atlas está formada por 70 láminas histológicas que presentan por ambas caras una serie de fotomicrografías en color ordenadas de tal modo que pueda identificarse la estructura histológica de un mismo órgano a aumentos progresivos en los que se especifica cada detalle histológico mediante una serialización.

Atlas color de citología e histología Wolfgang Kühnel,2005 **Histología veterinaria** Horst-Dieter Dellmann,Esther M. Brown,1976 **Birds - Conservation, Research and Ecology** Heimo Mikkola,2023-10-04 Birds are among the best known and most popular animals. With the help of modern technology like mobile identification even non-academic birders can fully participate in scientific data collection. Unfortunately, birds suffer badly from agricultural changes, forest fires, logging, plastic waste, urban noise, and large windows. They may also carry viral diseases that will eventually affect humans. This book includes nine chapters from all over the world that discuss these problems and propose possible solutions for better conservation of birds.
