How to Build a Habitable Planet Charles H. Langmuir, Wallace Broecker, 2012-08-13 A classic introduction to the story of Earth's origin and evolution revised and expanded for the twenty first century Since its first publication more than twenty five years ago How to Build a Habitable Planet has established a legendary reputation as an accessible yet scientifically impeccable introduction to the origin and evolution of Earth from the Big Bang through the rise of human civilization This classic account of how our habitable planet was assembled from the stuff of stars introduced readers to planetary Earth and climate science by way of a fascinating narrative Now this great book has been made even better Harvard geochemist Charles Langmuir has worked closely with the original author Wally Broecker one of the world's leading Earth scientists to revise and expand the book for a new generation of readers for whom active planetary stewardship is becoming imperative Interweaving physics astronomy chemistry geology and biology this sweeping account tells Earth's complete story from the synthesis of chemical elements in stars to the formation of the Solar System to the evolution of a habitable climate on Earth to the origin of life and humankind The book also addresses the search for other habitable worlds in the Milky Way and contemplates whether Earth will remain habitable as our influence on global climate grows It concludes by considering the ways in which humankind can sustain Earth's habitability and perhaps even participate in further planetary evolution Like no other book How to Build a Habitable Planet provides an understanding of Earth in its broadest context as well as a greater appreciation of its possibly rare ability to sustain life over geologic time Leading schools that have ordered recommended for reading or adopted this book for course use Arizona State University Brooklyn College CUNY Columbia University Cornell University ETH Zurich Georgia Institute of Technology Harvard University Johns Hopkins University Luther College Northwestern University Ohio State University Oxford Brookes University Pan American University Rutgers University State University of New York at Binghamton Texas A M University Trinity College Dublin University of Bristol University of California Los Angeles University of Cambridge University Of Chicago University of Colorado at Boulder University of Glasgow University of Leicester University of Maine Farmington University of Michigan University of North Carolina at Chapel Hill University of North Georgia University of Nottingham University of Oregon University of Oxford University of Portsmouth University of Southampton University of Ulster University of Victoria University of Wyoming Western Kentucky University Yale University

[The Sure Thing](#) Nick Townsend, 2014-02-27 _____ The bookies always win. But one man has been proving them wrong for four decades. In the summer of 1975, Barney Curley, a fearless and renowned gambler, masterminded one of the most spectacular gambles of all time with a racehorse called Yellow Sam. With a meticulous, entirely legal plan involving dozens of people, perfectly timed phone calls, sealed orders and months of preparation, Curley and Yellow Sam beat the bookmakers and cost them millions. They said that it could never happen again. But in May 2010, thirty-five years after his first coup, Curley staged the ultimate multi-million pound winning sequel. [The Sure Thing](#) tells the complete story of how he managed to organise the biggest gamble in racing history and how he then followed up with yet another audacious scheme in January 2014.

Orsi,2013-10-31 Between Heaven and Earth explores the relationships men women and children have formed with the Virgin Mary and the saints in twentieth century American Catholic history and reflects more broadly on how people live in the company of sacred figures and how these relationships shape the ties between people on earth In this boldly argued and beautifully written book Robert Orsi also considers how scholars of religion occupy the ground in between belief and analysis faith and scholarship Orsi infuses his analysis with an autobiographical voice steeped in his own Italian American Catholic background from the devotion of his uncle Sal who had cerebral palsy to a crippled saint Margaret of Castello to the bond of his Tuscan grandmother with Saint Gemma Galgani Religion exists not as a medium of making meanings Orsi maintains but as a network of relationships between heaven and earth involving people of all ages as well as the many sacred figures they hold dear Orsi argues that modern academic theorizing about religion has long sanctioned dubious distinctions between good or real religious expression on the one hand and bad or bogus religion on the other which marginalize these everyday relationships with sacred figures This book is a brilliant critical inquiry into the lives that people make for better or worse between heaven and earth and into the ways scholars of religion could better study of these worlds
